

.Net Developer .Net Developer .Net Developer - CVSHealth Florham Park, NJ Have experience in diverse facets of .NET development, application development based on analysis, design, development, and execution of business applications. Experience in Client-Side Technologies and frameworks such as .Net and SQL Management Studio 2012. Extensive programming experience using ASP.NET, Microsoft SQL Server and Oracle database, JavaScript, Angular 2. Experienced in ASP.Net MVC 5.0 which helps in implementing Model, View, Controller. Excellent communication skills with strong background working directly with team and clients to identify business objectives and establish requirements. Hands on experience in design using Object oriented Programming Principles like Inheritance, Polymorphism, Abstraction and Encapsulation. Worked on Token Authentication for the Security Side Applications Experience in developing highly interactive web application using JAVASCRIPT, HTML 5, CSS, JSON , D3.JS, Angular JS 1.2/1.5 and Bootstrap, Angular Js. Ability to create web applications writing on HTML, CSS, AJAX, JAVASCRIPT and JQUERY. Proficiency in building responsive and mobile optimized websites using Bootstrap. Proficient in Writing, Analytical Skills and Verbal Communication Skills. Worked with resources like AZURE Cosmos DB in Microsoft Azure along with ASP.net Technologies. Strong team builder having excellent analytical skills with capability to handle new technologies. Having experience in workflow frameworks and also micro- services Solid skills for Management such as Communication & Time with good team skills for improving the intention to work in fast paced environment. Authorized to work in the US for any employer Work Experience .Net Developer CVSHealth - Florham Park, NJ December 2018 to Present Responsibilities: Design, develop and deploy multiple components and Version Control, Dynamic Content, A/B Testing, Categories, Tags, and Search etc. Designing and defining the structure and architecture of API, and using business logic based on interactions with stakeholders and product owners and working on functioning of UI Designed a Web application using Web API with AngularJS/Angular2. Worked on Microsoft Technologies for the project such as Visual Studio 2017/15, .NET framework , C# 4.7.2, Sql Server 2017/16. Design and implementing components using ASP.NET (C#) and JavaScript, using latest industry standards and best practices. Used Bootstrap styles extensively to get the right styling for

the Web Pages. Working on creating Services using ASP.NET Web API and C#. Involved in developing user manuals and help documents. Proficient knowledge and working experience with Angular 2, C#.Net and Microsoft SQL Server. Includes development of new applications, testing and supporting various platforms. Problem solving in troubleshooting skills along with documentation. Involved in code writing with API's, Web Services using AJAX, JSON,XML. Created templates and bind different components with specific models using Angular JS/ Angular2. Using Sql Server 2017 database as back- end along with ADO.NET Entity Framework and Linq to access the database tables. Participated in writing complex SQL Statements, Views and Stored Procedures, Indexes to validate data. Communicate effectively with the scrum master, product owners and business stakeholders/ end clients and fellow team members to facilitate understanding of deliverables, prioritization, and required effort. Converting solution for each existing ASP.Net 1.1 / 2.0 application into ASP.Net web application using new Kindred Standard Common Library and .Net Framework 3.5 and SQL 2005. Developing the view models and controller actions method to fetch the data from the back end rest services and send it as Json objects to the views. Writing the Contract models, Domain models to consume the Rest Services and converters to map between contract models and domain models. Contribute to production deployments, including technical documentation, participation in change control processes, and creation of release notes. Full Stack .Net Developer Unilever - Englewood Cliffs, NJ November 2017 to March 2018 Responsibilities: Involved in Requirement gathering, Design, Development and Testing of Web Form. Experience in creating web applications using Bootstrap, HTML5, React JS and CSS3 taking PSD to HTML directly. Developed Views and WebForms using MasterPages, Layouts,HTML helper and JQuery with engine using MVC3 model. Work experience on Tokenization as Asp.net tokens for providing the security for all types of clients Used JavaScript, AngularJS, Angular 2 andAJAXtechnologies for front end user input validations. Designed and developed various abstract classes, interfaces, classes to construct the business logic using C#. Implemented technical use cases by designing and developing the appropriate web pages in Asp.NET using C# code behind. Involved in developing ASP.NET application using MVC 3 design pattern. Developed and Consumed XML

Web Services (SOAP). Developed UI with JavaScript, JSON, Node JS, HTML5, jQuery UI and D3.js. Implemented MVC design pattern for developing the Web Application and used MVC5 application using Razor syntax for view engine, also used C# for the back end. Designed, developed and implementation of services using SOAP\REST, creating REST services using ASP.NET Web API. Used ADO.NET as a data source for accessing databases. Stored Information about queries, exchanges and bindings and distributed database. Worked with modules like MongoDB and mongoose for database persistence using Node.js to interact with MongoDB. Experience migrating from Microsoft SQL to MongoDB. Extensively used ADO.NET objects such as Data Adapter, Data Reader, Dataset and Data View for reading/updating records in the database. Involved in writing complex SQL Statements, Views and Stored Procedures, Indexes to validate data and ensure system integrity and security. Written LINQ functions for data access. Worked on Message Queue Tasks for Bypassing and receiving messages, specifying and falling when time-out occurs and overwriting the message. Experience in programming tasks-stored procedures, triggers, cursors using SQL Server with TSQL. Participated in periodic technical reviews of various modules and developed schema to improve them. Familiar in updating, accessing and version controlling the code using Team Foundation Server (TFS), sub-version and GitHub. Actively participated in Scrum meetings of the project implemented in Agile project management methodology.

**.Net Developer CBS News - New York, NY January 2017 to May 2017 Responsibilities:** Involved in collecting, analyzing and understanding the business requirements from the customers and business analysts. Involved in full Software Development Life Cycle (SDLC) for analysis, design, development, documentation and testing of projects and deliverables. Implemented UI using ASP.NET, C#, .NET, MVC 4.0, HTML5, XML, D3.js, JavaScript, React JS, Node JS, CSS3, Angular JS, Angular 2, AJAX, Bootstrap, Express and server controls. Experience in adding Multi-factor authentication to Asp.NET and C# for prevention of fraud.

Designed UI using the HTML, JavaScript, CSS, jQuery 2.1.1, Knockout.js, Bootstrap Twitter- Type ahead. Used ASP.NET MVC Page Controller pattern to add functionality to individual pages such that to accept input from the page request, invoke the requested actions. Worked with npm

commands and using package.json for managing dependencies and dev-dependencies of node js applications. The tech stack is AngularJS, Angular 2 Express and innovative server side technologies like Node.js, MongoDB (MEAN Stack). Experience in design and implementation of services using WCF SOAP\REST, creating REST services using ASP.NET Web API. Used WPF of .NET for creating control templates and more appealing visual appearance. Developed code to validate the user credentials for authenticating user to access the WCF service. Used ADO.NET extensively for retrieving, querying, storage, and data manipulation for achieving continuous database connectivity. Customized Publishing pages with workflows in SharePoint 2010 Designer.

Worked on cloud computing using Windows Azure and SQL Server Azure. Used and Worked on Mongo-DB database concepts such as locking, transactions, indexes, replication and schema design. Experience in Installing, Administering, and Optimizing MongoDB instances Configure Backup and Recovery Methods for MongoDB. Created and maintained databases, tables, stored procedures, indexes, database check constraints, and business rules using T-SQL. Written simple to complex stored procedures using TSQL to retrieve the data from SQL Server database. Developed extensive Stored Procedures and Triggers in SQL Server, also developed classes for connecting to the SQL Server Database. Handled the SQL Server data tables to the WSS custom list. Synchronized SQL data with the respective List items on the SharePoint 2010 server for daily updates. Used MSMQ Microsoft Message Queuing for building applications. Performed Unit Testing with the testing tool NUnit and involved in Unit test case, code review checklist preparation and validation. Developed Agile Software Development methodologies to enable efficient and effective high-quality software development. Front End Developer Extranet Software Solutions - Vijayawada, Andhra Pradesh January 2014 to August 2016 Responsibilities: Participated in requirements gathering and compiled them into design document. Involved in Discussion Board for Client Interaction for the change requests and follow- ups. Developed user interface using HTML, CSS, JavaScript, Angular JS and Bootstrap and Azure. Utilized ASP.NET validation controls and JavaScript, jQuery to perform client-side validation Developed middle layer using C#.NET and ASP.NET. Created and used User Controls and Custom Controls. Used ADO.NET

for data retrieving, querying, storage and manipulation interface screens developed using ASP.NET.

Familiar with MongoDB clusters, performance tuning, backup and recovery. Implementation of MongoDB security mechanism with various Authentications. Created Joins, Views, functions, stored procedures and triggers as part of the Database programming. Involved in performance tuning and query optimization. Used forms based Authentication and role based Authorization for security. HTML, CSS, JavaScript, JSON, Bootstrap, and ASP.NET MVC pattern are used to develop the UI screens. Involved in designing database, creating tables, writing complex queries and writing Stored Procedures using SQL 2008. Used SSRS to generate reports and integrated with asp.NET web page using report viewer. Maintenance/Enhancement of Project and handling/fixing bug on daily basis reported by Help Desk Tested the application as per the test cases and business logic using unit test and fixed the bugs. Followed Agile methodologies (Scrum) and Test-Driven Development. Education Bachelor's Skills .net, Ms visual studio, Visual studio, Analysis services, C# Additional Information TECHNICAL SKILLS: .NET Technologies ASP.NET, .NET CORE,ADO.NET, VB.NET, Ajax, Web Services, Silverlight, WPF. Web Technologies ASP, VB Script, JavaScript, HTML, DHTML, JSON, XML, Bootstrap, jQuery, Angular Js, Windows Azure, CSS. Programming Languages C#.NET, Visual Basic.NET, C, C++, Java, PL/SQL Database SQL Server SQL Server Integration Services (SSIS), SQL Server Analysis Services (SSAS) Database MS-SQL Server 2016/2014, Oracle 11g, MySQL, MongoDB, TSQL Development Tools MS Visual Studio.NET 2017/2015/2013,2012, 2010/2008, Microsoft office suite Web Servers I Microsoft IIS (5.0/6.0, 7.0, 7.5), Windows Server OS 2008/2012.
