

Web Developer Web Developer Web Developer - Business Information Systems Elizabethton, TN
Authorized to work in the US for any employer Work Experience Web Developer Business
Information Systems - Piney Flats, TN 2015 to Present I have headed several web projects,
following an SRS and staying in budget and on deadline for the State of Tennessee as well as
projects for county clerks of various states. ? I am responsible for website maintenance and bug
fixes for many enterprise level websites. ? My daily tasks include adding customer driven
functionality to existing web apps as well as building new ones using javascript, node, vuejs,
webpack, php and various responsive design elements and libraries to build modular sites and
components. ? I am tasked with extensive use and modification of large MySQL and Microsoft SQL
database daily, as well as integrating webapps using both standard synchronous (OOP) and
asynchronous (api) methods both existing and created by me. Web Developer 2017 to 2017 Solely
responsible for the design, timeframe, and development of the <http://www.isaiah117house.com/>
charity website including gathering specifications from the founders. ? Added responsive design
and integrated with paypal to allow one time and monthly donations. Systems Manager Mahoney's
Outfitters - Johnson City, TN 2014 to 2015 I.T. Head for the transition from RICS point of sale
system to Celerant Command Retail. ? Brought the company up to PCI Compliance according to
the PA-DSS 3.0 version and was responsible for the change over to tokenization and Point to Point
encryption through our payment processor, Shift4. ? Prepared the company for the U.S. transition
to EMV chipped credit cards by recommending, purchasing, and installing EMV ready credit card
devices. ? Responsible for coordinating upper management with third party IT groups. ? In charge
of day to day Microsoft Server management. ? Responsible for re-coding and construction of the
store site including payment acceptance and adding merchandise as well as a mobile responsive
interface. Contract Developer The Battery - Johnson City, TN 2014 to 2014 Sole developer for a
website and custom content management system including design, schedule, and development. ?
The system took about 40 man hours and had a reservations, seating, and content manager.
