Work Experience Senior Software Developer Alegeus Technologies LLC - Waltham, MA September 2018 to Present

Wealthcare Administration: A web-based consumer directed healthcare solution: ASP.NET, Web API/ C# / SQL Server / Third party controls Worked on Wealthcare Administration Application at Alegeus. Alegeus is the market leader in consumer directed healthcare solutions, offering the industry's most comprehensive platform for the administration of healthcare benefit accounts, the industry's most widely-used benefit debit card, and powerful engagement solutions to help consumers maximize savings and optimize spending for their healthcare. Worked in all aspects of the application like UI, middle layer and database side. Important projects: Contributed in coding, testing, installation and support of enhancements to Consumer Driven Healthcare Products Responsible for design, development and maintenance of applications/tools using .NET technologies Worked with and monitored Offshore development teams. Worked in fast paced SWAT team to fix operations tickets reported by clients Contributed to all aspects of the application to do enhancement and fix existing bugs. Performed Quality Assurance duties when needed including writing and executing test cases This is an ASP.NET application. The product is based upon built in .NET controls, third party Telerik Kendo controls, SQL Server 2014, RESTful WebApi Services.

Software Developer Change Healthcare - Waltham, MA February 2014 to July 2018

Risk Manager: A web-based application for Providers: ASP.NET MVC ANGULAR 5.0, Web API/ C# / SQL Server / Third party controls Worked on Risk Manager, an application for providers helping them successfully manage changing payment models, while improving the quality and cost of care. Worked in all aspects of the application like UI, middle layer and database side. Important

projects: Contributed to the rebranding and reskinning project. When the company changed from McKesson to Change healthcare, the look and feel of the application needed to be changed. My contribution includes implementation of new logos and new design standards for the UI, update css for the new look and feel etc. Contributed to an enhancement project which involved writing a web api service to retrieve the data from the database and feed it to the UI. The UI was created using Angular 5.0. My contribution includes implementation of a UI screen using Angular 5.0 Contributed to the database side to add/update stored procedures to process data that's used by the application.

Contributed to creating some views for the datamart which were made available to the clients to query the data. Contributed to all aspects of the application to do enhancement and fix existing bugs. helped from time to time to test the application This is an ASP.NET MVC application. The product is based upon built in .NET controls, third party Telerik Kendo controls, SQL Server 2008.

Population Manager: A web-based application for Population Health: ASP.NET MVC/ C# / SQL Server / Third party controls Worked on Population Manager, an application guiding population health management, that automates acquiring and aggregation of both clinical and financial data to create a holistic view of the patients within a healthcare network. Worked in all aspects of the application like UI, back end and ETL side. Important projects implemented: Created a secure WCF service with client/server authentication to receive an Xds.b message that contains encrypted CCD. The CCD is extracted from the message and passed in to Rhapsody for further processing.

Contributed to the ETL side to add/update stored procedures to extract, transform and load the data from staging database to relational database that's used by the application. Writing a console application which is scheduled to run every night to process ADT and SIU messages. Contributed to the UI side of the Population Manager application to do some enhancement and fix existing bugs.

This is an ASP.NET MVC application. The product is based upon built in .NET controls, third party Telerik Kendo controls, SQL Server 2008. Software Developer Amerisource Bergen - Intrinsiq LLC - Burlington, MA October 2005 to January 2014 Intellidose: A stand-alone application for oncology: VB.NET / C# / SQL Server / Third party controls Worked on Intellidose, a leading clinical oncology information solution, that automates the clinical practice of oncology from the assignment of therapy

to the calculation of chemotherapy doses to the documentation of care. Expert in incorporating third party controls in the application (for example, ComponentOne and Infragistics winform controls).

Primary responsibilities: Adding new features to the Intellidose software    Fixing any bugs in the existing and new functionality    Building interfaces to exchange data to and from other Electronic Health Record systems using hl7 and some discrete API calls    Converting some COM UI WinForm controls to .NET WinForm controls    Writing unit tests    Helped converting the code from VB.NET to C#    Occasionally helping the QA team for testing the application    This is a .NET windows based application. The product is based upon built in .NET controls, some third party user controls, our own user controls, SQL Server 2005.

Associate Developer (XML) Argosy Publishing - Newton, MA  
 July 2004 to December 2004    Contract assignment XML Spy, Adobe Framemaker    Translation of print content into electronic format using XML (XMLSpy)    Examination of XML code to ensure publishing quality requirements were met    Work done in school Waltham, Massachusetts Sept 02 -Dec 03    Sept 2003 - Dec 2003:    Worked as a TA for Data Structures and Algorithms class (taught in C).    Sept 2002 - May 2003:    Worked on <http://medstract.med.tufts.edu/acro1.1/index.htm> in the group of Prof. James Pustejovsky in computer science department on a project called Medstract.
