Programming languages: Angular (versions 5, 4, 2 & 1.5), Java, PHP, Python, Android, C#, ASP.Net C, C++ Web Technologies: HTML5, HTML/XHTML, XML, jQuery, JavaScript, ES6 CSS Frameworks: Twitter Bootstrap 3, CSS 3 Databases: AWS RDS, Microsoft SQL SERVER 2005, MySQL Authorized to work in the US for any employer Work Experience Sr Software Beacon Health

Options - Atlanta, GA November 2017 to Present developer in Angular v4 / Java Spring Boot

Projects: Georgia DBHDD / IDD: This project is to develop a system that automates process for IDD (Intellectual & Developmental Disabilities) Providers in Georgia to review and process funds for people with disabilities. This system will be used by individuals who require services, agencies who can enter applications on their behalf and the staff (about 36 roles) who process their applications

Role: Create frontend framework for the whole application using Angular 4 & Typescript. Consume Java SprintBoot services in the UI to maintain state while accessing information necessary for the logged in users. Deploy application on various servers like Apache for UI, Spring boot on JBOSS and publish them on WSO2 servers

Technologies: Angular 4, TypeScript, HTML, Bootstrap, CSS3, SASS, Java, JBOSS, WSO2

Sr Software developer in Angular / Java / Python Rational Enterprise - Albany, NY October 2015 to November 2017

Projects: Rational Review: A hosted SAAS (software-as-a-service) that provides rich capabilities like document analytics, review, tag, code, track and automate the handling of all loading, culling, search, review, and production activities

Technologies: Angular 2.0, Java 1.8, Python, JQuery, ES6, Javascript, HTML5, Bootstrap, CSS3, Java, XML

Role: Using Agile development I was involved in requirement analysis, design, development and implementation for different modules of this application. Working on the frontend using Angular, writing RESTful services in Java and python (Gunicorn). Used AWS elastic search by coding in Java and python to create web services and integrate these services using Angular to provide an elaborate search and search results pages. Writing python services for data Analysis (using BigARTM, Word2Vec plugins) and generate various responsive graphs/charts (like interactive Probability charts and heatmaps) using Angular plugins(Highcharts) for analytics features like Predictive coding, Near Duplicate identification, Topic Modelling and email threading. Configured, deployed and hosted the site using Jenkins in AWS and Google Cloud environments.

Sr Software developer in AngularJs & PHP The Hub Agency December 2011 to September 2015

Projects: Scottish Clinics: It's a responsive web application to compare various clinics in Scotland. Clinics can register in the portal and enter various treatments information and prices. The end users can extensively search based on treatments and clinics and can interact with hospitals directly.

Technologies: AngularJs 1.4, HTML5, Bootstrap, CSS3, JQuery/Javascript, PHP, MySQL Duration: 8 months Role: Developed a responsive web application in AngularJs, Javascript and JQuery based on the design provided. Analyzed and designed database using MySQL. Created web services using PHP that can interact with AngularJs. Perform AJAX calls to load search results dynamically. Created a role based user friendly content management system for the admins and clinics to enter and monitor profiles and enquiries. Deployed and hosted the website in Hostxnow shared hosting.

Chivas Brothers' History: It's a responsive website for Chivas Brothers (Pernod Ricard) to view their history as a timeline and a family-tree. Technologies: PHP, HTML5, Bootstrap, CSS3, JQuery/Javascript, MySQL Duration: 2 months Role: Created two WordPress websites based on the design provided. Using PHP, JQuery and Ajax, I created responsive portals in the form of family-tree and timeline for viewers to know the history of the Chivas Brothers (AKA Pernod Ricard) and various brands it acquired and produced since its inception. Deployed and hosted the site in GoDaddy.

SuperZoo: It's a price comparison website to compare products from various websites like amazon, ASDA, Boots, and many more by making use of affiliate program and Amazon API. Technologies: PHP, HTML5, Bootstrap, CSS3, JQuery, MySQL, XML Web services, JavaScript Duration: 14 months Role: Created website using PHP and HTML5 to show price comparison of various products from multiple online retailers. Integrated data feeds in PHP from Amazon API and affiliate window based on unique product Identification standards like ISBN, SKU, UPC to group and compare product prices from different sites. Tracking user clicks and website transfers is monitored using JavaScript. Designed the database in MySQL.

Nuffield Health / Elanic Clinics: Over 25 individual WordPress responsive websites for Nuffield Health and Elanic Clinics, Glasgow for: cosmetic surgery, weight-loss, fertility problems, sexual problems, eye-care, skin-care, heart problems, breast-care, vein-care, hip and knee care, cardiology, oncology, ENT, rheumatology, hernia problems etc. Technologies: WordPress, PHP, HTML5, Bootstrap, CSS3, JQuery/Javascript, MySQL Duration: Varies between 3 weeks to 1.5 months for each portal Role: Create responsive WordPress websites based on design provided, test them for errors & host them.

PPI sites & Others: About 30 Payment Protection Insurance and 2 building construction websites

created using PHP, WordPress and HTML. Timesales: It's a secure web portal for The Hub Agency to maintain, update, email and track data feed from various websites. Enquiries can also be downloaded in various formats like excel, pdf. Technologies: PHP, HTML5, Bootstrap, CSS3, JQuery/Javascript, MySQL, XML Duration: 1 month Role: Design a simple portal in PHP, MySQL, JavaScript and HTML for The Hub Agency so they can track enquiries from PPI sites and the other health portals. Software Developer in Android Appour Technologies - Hyderabad, Telangana April 2010 to November 2011 Projects: MedPGMasters: It's a web and mobile application questionnaire for students studying medicine to take exams so they can get into PG. Once the tests are taken, it provides answers with detailed explanation with diagrams wherever necessary. Technologies: Android, Java, PHP, HTML, CSS, JQuery/Javascript, MySQL, XML Duration: 10 months Role: Designed and developed database architecture using MySQL. Developed RESTful web services using PHP & MySQL. Customized Wordpress to show the static content of the website. Developed dynamic pages PHP, HTML, JQuery for the questionnaire part of the website using the web services. Built separate secure content management systems using PHP to maintain student and questionnaire modules. Using ADT for Eclipse, I designed and developed an Android application making use of the PHP web services. Hosted the website in GoDaddy; Signed and deployed the app in Google play store. Alphakids: It is a game for toddlers to learn English alphabets and words. It contains interactive games like letter identification, find the missing letter, jumbled letters for three and four lettered words Technologies: Android, Java, XML Duration: 3 months Role: Making use of 5 views I created a simple game for toddlers using Java in Eclipse Indigo using ADT PharmaDroid: It is an application that sets reminders to take medicines and to keep track of the inventory of the medicines Technologies: Android, Java, XML Duration: 4 months Role: Created an app using Java in Eclipse Indigo using ADT. It uses activities, views, push notifications to get reminders, browser integration to get medicine information and SQLite to store user data. Picalo: It is a photo and album sharing application on Facebook. It is designed to help users share their photos with new and existing friends Technologies: PHP, JavaScript, FBML(XML), MySQL Duration: 2 months Role: Created a facebook application that uses FBML using Oauth authorization

for sharing images into albums between user groups Software Developer in C# .NET Kamonics Business Services - Hyderabad, Telangana November 2007 to April 2010 Projects:

Fantasticalgarve.com: It is a holiday portal for Algarve and Madeira. Features include hotel reservation, weather forecast, vacation rentals, calendar management, etc. (Duration: 6 months)

Lavintees.com: It is an E-commerce portal with features such as product catalogue, inventory management, shopping cart, payment processing with PayPal/google checkout, order processing, account management, etc. (Duration: 5 months)

Srijan Pharmaceuticals: It is a portal for Srijan that provides facility to sell chemicals and drugs to other pharmaceutical manufacturing companies. Features include product catalogue, price & quantity chart, ticker, user management, transaction history, pending payments, coupons management (Duration: 7 months)
