

FRONTEND DEVELOPER AND SALESFORCE DATABASE ADMIN FRONTEND DEVELOPER AND SALESFORCE DATABASE ADMIN FRONTEND DEVELOPER AND SALESFORCE DATABASE ADMIN - ONASSIS FOUNDATION USA Work Experience FRONTEND DEVELOPER AND SALESFORCE DATABASE ADMIN ONASSIS FOUNDATION USA November 2016 to Present

Worked as a Front end Web Developer to create features and enhancements for the Foundation website <http://www.onassisusa.org> using JavaScript, React JS, HTML and CSS, PHP and Twig. ? With a team of 3, worked on developing event pages, festival pages, event-filter, dropdown-menu functionalities on various sections of the website. ? Extensively used ES6 features and JavaScript best practices for development. ? User management and role management for the CMS accessibility, analyzed the website activity/ users/ page views/ session rate using google analytics. ? Created a Calendar section to display the upcoming events with a filter section to distinguish events based on different categories. ? Implemented pagination on the Multimedia and Calendar section to control the amount of entries displayed per page. ? Integrated Salesforce database to the website "contact page", used salesforce REST API to POST the user information to the Salesforce CRM. ? Used Bitbucket to control and build code for development and production respectively with weekly releases using Agile methodology. ? Used Webpack to bundle the files and Babel to transform es6 to older working versions of JS. ? Salesforce / Marketing Cloud Administration: Worked extensively as a Salesforce Administrator- maintaining Organization's Database. User management, role management, pulled reports and troubleshoot the CRM functionality. Coded responsive email marketing templates using HTML and CSS best practices for email marketing campaigns on Marketing Cloud.

FRONTEND WEB DEVELOPER PHONE LCD PARTS July 2016 to July 2016 Ecommerce Website: ? Maintained the E-commerce store with BigCommerce. ?
