

Web Developer, Senior Analyst Web Developer, Senior Analyst Web Developer, Senior Analyst - Accenture Interactive Huntington Beach, CA I have been working professionally in various areas of technology for more than 25 years - but my passion for it has been lifelong. I have managed a worldwide network of over a hundred thousand users single-handedly with a 100% success record- all while running the entire global technical support department and all technical training and documentation. I have taught web service industry seminars for multi-million dollar investors and I have developed web and software solutions for countless industries used around the world in many different languages. I have led and managed teams of technicians and developers on diverse projects. I am an innovator and a solution provider who has a broad understanding of many technical disciplines- a person who can help inspire and manage your team to success or guide your project to completion.
