

Freelance Web Development Freelance Web Development Colin has worked with online and digital businesses both as a web & app developer, in the industries of private agencies, online commerce, local government, utilities, and the financial banking. As an App Developer, he built the front end of a personal banking debit card app while using an in-house API to update the backend. Colin incorporated concepts of templated components, extensive visual animations, and haptic feedback.

As a Web Developer, his skills include working knowledge of several various web-based languages, User Experience & User Interface design (UX/UI), online interactions, web design, and working within small, innovative teams of developers in an Agile/Scrum setting. Colin also has extensive knowledge on IT operations, middleware experience, and some back-end experience with things like Node.js and SQL. Work Experience Freelance Web Development January 2014 to
