[linkedin.com/in/chris-f-806560120](https://www.linkedin.com/in/chris-f-806560120) For the past 18 years I have been focused on database technologies. SQL Server is my main focus but I do have experience with Oracle at a developer level. I have done many projects updating, consolidating, reorganizing, and creating SQL Server farms. Database size has ranged from very small to 10TB. I have been in IT since 1984.

Authorized to work in the US for any employer Work Experience Sr Enterprise Database Administrator Financial Services Company - Dallas, TX November 2017 to April 2019 Reconfigure SQL Server farm from ground-up. Set standards for configuration, use, and care of all SQL Server instances. Custom write centralized backup solution using T-SQL only.
