

Information Security Analyst Information Security Analyst Information Security Operations and Compliance Audit Saint Paul, MN I have had the rare opportunity of holding security roles at multiple cloud computing (SaaS) organizations dealing with very sensitive customer data. Privileged in these roles to develop policy and procedure documents in an effort to build an Information Security Management Program (ISMS) for ISO 27001-2013 compliance. I successfully got this program audited by an independent third party for certification. I also oversaw the company's Cloud Security Alliance's STAR Self Assessment for approval and publication. Other skills honed over the years include but not limited to:

- Extensive knowledge of all common business-related IT functions and technologies
- Deep understanding of core technologies to be able to conduct a thorough security and process risk assessment
- Extensive knowledge of ISO 27001 implementation as part of an information security program for certification
- Extensive knowledge of PCI-DSS implementation and compliance as part of an information security program
- Extensive knowledge of Cloud Security Alliance STAR program for cloud systems security and auditing
- Proficiency in communicating technical jargon into user-friendly terms to non-technical individuals

Authorized to work in the US for any employer
