

Front End Software Developer Front End Software Developer Front End Software Developer @  
Telzio Los Angeles, CA Work Experience Front End Software Developer Telzio - Los Angeles, CA  
October 2018 to July 2019 Telzio offers a cloud-based phone system accessible via web browser or  
physical desk phone. I developed several multimedia features for Telzio applications including audio  
playback components with native animations, audio recording functionality, and the handling of  
graphic/video assets for the web. In charge of all frontend development on Telzio's Mobile App.  
Built new features for Telzio's enterprise web application and regularly fixed bugs. Developed the  
Telzio Browser Extension top-to-bottom. In charge of enhancing and adjusting the Telzio  
deployment automation pipeline. Managed outsourced work and migrated contributions to the  
Telzio website. Multimedia Specialist & Educator Wilshire Blvd. Temple Camps - Malibu, CA June  
2018 to August 2018 Wilshire Boulevard Temple Camps is one of the biggest and most well-known  
summer camps on the West Coast. During camp, I wrote curriculum for and instructed digital media  
classes for children ages 6-16, as well as producing several kid-centric community videos and short  
films. Used Premiere to edit and produce over 60 mins of A/V content for campers. Directed  
audio/video production while filming large camp events. Coached campers to brainstorm and act  
in short films, and produced the films. Offered auxiliary design services on other camp media in  
print and online. Web Developer & Design Lead Senders Communication Group - Los Angeles, CA  
January 2018 to June 2018 Senders Comms. Group focuses on publicity and advertising campaigns  
for national unions and non-profits. I was in charge of creating digital assets and updating the  
content on large client websites. I was also lead designer on two issues of Labor 411, a print  
publication with a national audience. Created beautiful webpages for client orgs and internal  
campaigns/events. Developed React interface for browsing regional job listings databases. Led  
design and layout on popular print publications with a national audience. Wrote scripts for AWS  
DynamoDB & Cognito while developing union directory app. Node.js Developer & Web Designer  
NewsMaker Systems, Inc. - Moorpark, CA December 2015 to December 2017 NewsMaker offers  
the only video automation suite for the NewTek TriCaster. The NewsCaster encodes, transcodes  
and stores digital video files, which it then serves to the TriCaster based on a user-composed show

queue. Developed NodeJS/React utility app to monitor and update NewsCaster system. Operated, supported and assembled NewsCaster video automation server system. Led editing and design of technical manual & documentation production. Designed and built fresh company website & application UI for NewsCaster system. Worked with TV-ready video assets and pipelines from professional newsrooms. Education Bachelor's in Multimedia Production California State University, Northridge - Los Angeles, CA Bachelor's in Geographic Information Systems California State University, Northridge - Los Angeles, CA Skills React, Javascript, Front End, Front-End, User Interface, UI, HTML5, JQuery, CSS3, Node, Bootstrap Links <http://linkedin.com/in/hmw> <http://github.com/hunter-digital> Awards Two Time 1st Place Winner @ CSUN Multimedia Showcase 2016 I also won Student's Choice Award once. Earned \$3k Interactive Media Scholarship Award 2015
