

Software Developer II Software Developer II Software Developer II - O'Reilly Auto Parts Eldon, MO I am a Software Developer seeking a development position that will allow me to grow in my knowledge and career while producing clean coding solutions to support your companies needs.

Coding Experience I began working at O'Reilly as an intern in June of 2017 and transitioned to a full time status that November as a Software Developer. I am part of the Retail Production Support team where our primary focus is code maintenance and other projects and improvements that our team identifies. Authorized to work in the US for any employer Work Experience Software Developer II O'Reilly Auto Parts - Springfield, MO June 2017 to Present Primarily I focus on recreating and identifying bugs in O'Reilly's point of sale system. Once I've identified the issue I will fix the code and push to our RPS branch. ? The first project I worked on was adding functionality to a web service that would identify discrepancies between our sales and our third party companies. This was primarily SQL. I would then use the store id, possible invoice number and amount to search the store logs for that transaction and possible error. ? I was part of a three man team that wrote our credit card gateway to interface between our point of sale and the third party pin pad software. Education B.S. in Computer Science Software Development Missouri State University(MSU) - Springfield, MO December 2017 Skills C++ (Less than 1 year), GIT (2 years), Java (2 years), Python (2 years), SQL. (2 years), VB.NET (Less than 1 year), Linux (Less than 1 year) Additional Information Skills Java Python SQL C++ GIT VB.NET
