

Network Engineer / IT Contractor Network Engineer / IT Contractor IT Manager Flemington, NJ I am an accomplished information technology professional pursuing a role where I can leverage my solid networking background and practical managerial experiences to expand both my technical and leadership abilities. I have a passion for bettering an organization through the use of technology while providing 100% to an organization's overall strategic vision and goals. My Professional Experience dates back approximately 8 years. Work history prior to this time can be provided as needed. Authorized to work in the US for any employer Work Experience Network Engineer / IT Contractor Apex Systems - Allentown, PA June 2019 to Present In this contractor engagement, I am responsible for the configuration, management, sustainability and day-to-day operations and support of the enterprise's IT network infrastructure. Providing network engineering/administration of Checkpoint Firewall / VPN Management/supervision of network performance monitoring tools (PRTG, Cisco Prime, NetScout) Collaborator in the organization's overall I.T. architecture; technology strategizing & planning activities to ensure business objectives are being addressed Support of remote access technologies, enabling internal users with anytime, anywhere accessibility to business applications Creating project and infrastructure documentation Device configuration for network equipment based on architecture, functional and/or project requirements Team Lead, Networking Crayola, LLC July 2018 to June 2019 I was promoted to this supervisory position after displaying superior managerial and technical skills that were successfully aligned with the organization's cultural and strategic visions. I am leveraging my technical knowledge to support the IT network infrastructure for all Crayola and Crayola Experience facilities. Responsible for the enterprise's IT network infrastructure - architecture, administration and support Providing network engineering/administration of Cisco ASA VPN appliances, switches and routers Delivering network security administration using Cisco ISE and ACI Facilitating Cisco IronPort Web Proxy administration, administration of wireless infrastructure as well as LAN/WAN monitoring and support Utilizing project management skills to provide direct oversight for all networking related projects Producing ongoing managerial, project and infrastructure related documentation, such as: employee reviews, statements of work (SOWs), status reports, network diagrams, IPAM, standard operating

procedures (SOPs)      Networking liaison between Crayola and Hallmark's Information Security Team      Offering architecture expertise and consulting to Governance staff, Systems Analysts and other cross- functional project teams      Working hand-in-hand with the Client Services, Systems Analysts and Systems teams throughout a project's life cycle      Facilitating weekly internal project status meetings      Participating in departmental plan-of-the-day and plan-of-the-week strategic meetings      Day-to-day supervision and management of direct reports and 2 consultants      Budget, supply chain, vendor and contract management tasks as projects dictate      Senior Network Administrator Crayola, LLC February 2018 to July 2018 Under supervision, I was given project related tasks and activities to help support the IT network infrastructure for Crayola.

Responsibilities included:      o facilitated tier II support as needed      o drafting network documentation      o configuration of Cisco appliance      o project team member on networking related projects      Network Administrator Members Support Service, LLC January 2017 to February 2018 In this position, I leveraged my prior skills to administer and support the entire IT infrastructure for three partner credit unions.      Handled network engineering/administration of firewalls, switches, and routers (Cisco, Fortinet, HP)      Windows (2008/12) server administration      MS Exchange 2010 system administration      Project management experiences      VoIP (Vertical) phone system administration and support      VMware and VDI virtual environment administration and support      Antivirus (Trend Micro) administration and support      IPS/IDS (ForcePoint/ Websense) system administration      3rd party infrastructure backend support      LAN/WAN monitoring and support      Escalation point in helpdesk/desktop user support      Network Administrator / IT Contractor Kforce/Sanofi November 2015 to December 2016 During this contractor engagement, I monitored all operations of internal Cisco based network systems for the Americas (North/Central/South), troubleshooting network connectivity as well as facilitating maintenance of Cisco based networking equipment.      Supervision and troubleshooting of Cisco and Aruba based wireless networks      Executed internal F5 load balancer configurations and maintenance on VIPs and nodes      Supervised F5 SSL certificate management      Administration of Riverbed WAN optimization systems      Addressed other network related issues for other departments dealing with maintenance, troubleshooting and

configurations Network Administrator / IT Contractor Robert Half Technology/Credit Union of New Jersey October 2015 to November 2015 During this contractor engagement, I was tasked with maintenance and administration of Exchange 2010, Cisco ASA firewalls, Cisco Wireless, Windows Server 2008 and MS Active Directory. Additionally, there were tasks related to desktop support, help desk portal build and other IT focused projects. Network Engineer A.M. Best August 2014 to February 2015 While employed with A.M. Best, I oversaw enterprise connectivity across the office's global infrastructure. I was afforded the opportunity to be involved in a variety of tasks and projects in this organization. I was directly involved in documentation maintenance and enforcement of the company's best practices for network and IT infrastructure security. Manager, Network Services ACI Worldwide June 2013 to August 2014 As manager, I oversaw the network infrastructure for 4 H-ORCC offices and supervised 4 direct reports. Utilizing my experience and relationships within ACI, I pushed the team to maintain a 99.998% uptime on the H-ORCC network infrastructure. With a project focused mindset, my team and I provided assistance to the Corporate IT Infrastructure team for internal connectivity projects; this included configuration and management of (F5) load balancers for better overall network traffic performance. Network Engineer ACI Worldwide February 2012 to June 2013 ACI was encouraged by both my passion to learn and dedication to my career so I transitioned into the Network Engineer role. My responsibilities included day-to-day network monitoring for nine locations (8 US, 1 International), configurations of firewalls, switches, and routers as well as switch-port configurations and Site to Site and business VPN configurations. In this operational-facing role, I assisted the operations group in connection services/system outages, maintaining HIPAA, PCI, and HSM compliance for enterprise network environment. Systems Engineer II ACI Worldwide April 2011 to February 2012 In my time as a Systems Engineer, I was tasked with server builds including data center rack management and active directory (2003) management. I ran Novell user identity management and NFS share as well as Lotus Notes user identity management. Using my technical talents, I participated in desktop/laptop builds, system image management, data encryption as well as MS software patch management.
