

Director, IT Project Management Office Director, IT Project Management Office Director, IT Project Management Office - Lower Colorado River Authority Work Experience Director, IT Project Management Office Lower Colorado River Authority - Austin, TX May 2016 to Present

Accomplishments:

- * Delivered IT project portfolio of \$28 million, consisting of different business units, managing a team of internal and external project consultants.
- * Commended by CEO for successfully leading a critical Distributed Control System (DCS) upgrade project to completion on a tight timetable.
- * Spearheaded the development of portfolio management, analysis, QA/QC, and reporting tools using business intelligence applications.
- * Provided crucial consultation and expertise VP in development of executive report dashboard and strategic plan.
- * Served as key liaison between PMO and different business groups to understand business expectations and objectives and meet them.
- * Provided vital in-depth consultation to organizations and universities for PMO best practices in analysis, reporting, and managing IT and cybersecurity projects.
- * Created and standardized project schedule templates and other project artifacts such as PMO gates and criterion, risk register, issue log, and kick-off template.
- * Developed and balanced portfolio for resource utilization to identify resource constraints and availabilities.

Infrastructure and Security manager Amplify Credit Union - Austin, TX March 2015 to April 2016

- * IT Security Program - Development and implementation of a security program based on company-wide risk assessment and gap analysis. CIS top 20 critical controls were the foundation of the program.
- * Incident Response Plan - Prepared and rolled-out Incident Response Plan which included preparation, identification, containment, eradication, and recovery phases and steps, using existing and new tools and processes.
- * Security and Network Assessments - Coordinated and carried out several assessments based on various audit and regulation requirements. This included organizing and preparing documents from various departments and individuals, and generating reports from various tools.
- * End-point Protection - Researched and deployed end-point protection solution across the enterprise, thereby reducing the number of incidents that were occurring by at least 10%.
- * Mobile Device Management - Replaced existing in-house MDM solution with cloud-based solution. This included performing research, PoC, and getting a company-wide buy-in for successful

implementation. * Change control application - Developed a change management program and implemented a change control solution which included processes, guidelines, and training. * Backup, Disaster Recovery, and Encryption - Ran projects based on business continuity planning and disaster recovery, and security objectives. IT Project manager Marsh & McLennan Companies - New York, NY May 2014 to March 2015 * Logical Security Project - A global enterprise-wide project that spanned four operating companies. Managed one of the tactical streams across all operating companies, and also served as a point of contact for other project streams. Led workshops and provided project analysis and status reports to stakeholders. * Asset Management Program - A global initiative to implement a robust asset management program. Led vendor meetings and demos, prepared scorecards for vendors, negotiated agreements and terms, presented project analysis and status reports, and managed Proofs of Concepts of selected tools or vendors.
