

Senior Database Administrator Senior Database Administrator Silver Spring, MD Dedicated professional with a little over 7 years experience as a database administrator. knowledgeable in database security, database management, communication skills, and problem-solving, performing several DBA services across multitude platforms including Linux, Solaris, Windows. A proactive and motivated individual with strong leadership and interpersonal skills, who can be trusted with highly sensitive and confidential documentation and projects. Possess excellent written and verbal communication and a team player who is fast at picking up new technology with great attention to detail. Work Experience Senior Database Administrator Citibank Financial - Washington, DC April 2017 to Present Created databases from Entity Relational Diagrams (ERD) in Forward Engineering using the Oracle SQL Developer to OFA Institution and finally to DB launch. Installed oracle 12c in Linux operating system and migrate databases from 11gr2 to 12c. Followed System Development Life Cycle (SDLC) methodology for designing, analysis, development and implementation. Implemented a backup strategy following company SLA; execution of backup schedule for both physical and logical backups using RMAN and DATAPUMP utilities respectively. I also used block change tracking (BCT) which reduced incremental level 1 backup time from 3hrs down to 20mins. Applied Oracle's quarterly Critical Patch Update (CPU/ PSU application) using Opatch utility to install, test, and deploy patches to all database instances. Education Associate Degree in Gen Ed Montgomery College 2013 to 2017 Skills Work with elderly and kids with mental disability (2 years)
