

Network Administrator Network Administrator Network Administrator - Winthrop and Weinstine Marine on Saint Croix, MN Work Experience Network Administrator Winthrop and Weinstine - Minneapolis, MN December 1997 to Present Responsible for managing all backend systems for a 250-person law firm, with revenues over 25 million. Responsible for implementing and managing 100% VMware virtualized network, with over 120 servers and 250 desktops. Using Horizon View for remote access, is a big advantage for our lawyers. It gives them access to all the resources of the network, during a trial, at a client's site or at home. All remote access is authenticated using MFA. DR is accomplished using vSphere replication and SRM at our remote data center. Redundant Exchange, AD, vCenter and Horizon View servers are live at the DR site. Designed and Implemented a system to clean client data before it's used by Relativity (eDiscovery). Raw data from our clients' machines are scrubbed using series of subnets and antivirus/malware software before being read into Relativity. Since following this procedure no malware has been introduced onto our system from client's data. Recommended and implemented Palo Alto 850 firewall. Our annual external review with TechGuard found no vulnerabilities. We have changed our SIEM reviews with Rapid7, from monthly to quarterly because the logs are clean and there's little to discuss. Responsible for planning and executing a network consolidation and move to a new location. Completed in the time window provided and saving over \$250,000 in consulting fees. Primarily responsible for the following network hardware and applications: OS: Windows 2016/2012 vSphere: VMware Esxi 6.7 Workstations: 250 Horizon View 7.0 Remote Access: Horizon View 7, with MFA Hosts: Cisco UCS blade servers M4 and M5 SAN: Nimble 5000 (60TB) Switches: Cisco 4500, 3570, 6530 Firewall: Palo Alto 850 and Cisco Umbrella SIEM: Rapid7 Email: Exchange 2016 (250 users) and Mimecast Monitoring: Solar Winds Orion Updates: Ivanti Patch Manager Cloud: Azure, MFA Network Consultant - CNE Business Microvar Inc August 1991 to November 1997 Provided application and network support to BMI's base of over 500 clients.
