**Work Experience**

**Developer United Nations Volunteers** July 2018 to October 2018  
**Responsibilities:** Developing a Power BI data model and dashboard which leverage public data on - Country Statistics - Financial Indicators - Natural Disasters - Development Projects The aim is to help humanitarian action at both national and international levels; to rationalize decision-making for disaster preparedness; and to provide an objective basis for vulnerability assessment and priority setting. It also helps to identify development requirements i.e. where are the needs (countries), what are the needs (sector of activity like education, health etc.) and how these are financed (project budgets etc.). Extensive use of API's to import and connect data in Power BI.

**Travel** May. '16 - Jun '18 USA Australia  
**Customer Service Volunteer**  
**Travellers Aid** June 2018 to September 2018  
 Travellers Aid provides support, advice and assistance to the travelling public including people with special requirements or experiencing travel emergencies. I assisted Travellers Aid with the Buggy Service; assisting older or mobility-impaired fans transiting to and from the MCG for the 2018 AFL season.

**Software developer Seronic (Pvt). Ltd**  
 August 2015 to May 2016  
**Project 1: Seronic HRM System** Environment: Visual Studio 2012, SQL Server Management Studio, LINQ, C#, ASP.Net MVC 4. Description: The project was company's own Human Resource Management System. It was built to keep track of employee's information i.e. their personal information and employment history.

**Project 2: Real Estate Project** Environment: Salesforce CRM, Force.com IDE, Apex Programming Language, Visual Force pages. Description: It was a real estate project built to facilitate the real estate agents so that they can update the property available for sale and purchase in their area. In addition to this, it also helped them in keeping the record of the buyers and sellers and their related communication.
