

Senior Front- End Developer - remote - on-demand Senior Front-End Developer - remote - on-demand Front- End Developer - Web Developer - Indie Game Developer - Freelancing Only San Francisco, CA Jerome Heuze was born and raised in Paris, France. Having moved to the United States as an exchange student in his teens, he attended high school in Michigan then University in California. Following completion of his studies, Jerome went on to work for 10 years as a Software Engineer in several industries. At present he is doing work for sustainability businesses, Crypto currency companies and mobile games developers. An entrepreneur at heart, Jerome is always looking for ways to educate and entertain, but he is also a budding writer and his books about Nintendo games are available for people who want to know more about their hobby and enjoy collecting classic games. In his spare time Jerome enjoys wandering around museums, making and collecting games, building websites, electronics, crypto mining and teaching his daughters about the wonders of technology and science. He also has a keen interest in astronomy, archery and science fiction entertainment. Jerome is looking forward to the day when space tourism becomes a reality and will allow people to travel throughout the solar system. Maybe one day he will take a vacation on Mars, or in Earth's orbit. Authorized to work in the US for any employer Work Experience Senior Front- End Developer - remote - on-demand Bridge Protocol January 2018 to Present Jerome has built KYC mechanisms for ProjectICO and been a part of other security web platforms like LifeLock and loves the challenge of new projects in data security.
