

Network Administrator Network Administrator Network Administrator Waco, TX I have 6 years of total IT experience, 3 of those years being in a professional setting. I performed all duties very confidently and never hesitated to test and implement new strategies in the company. I used to maintain networks within the organization as well as connected the organization globally. I have competent skills to solve all the problems occurred in the organization's networks. I used to provide trainings to the new staff members including network technicians to fulfill the requirements of the organization as per the standards of the organization. I have outstanding communication skills to communicate and coordinate all my new ideas with the technicians to put these ideas into practice successfully. I am also an expert in computer's hardware and software, installation, and configuration of the new software for better performance.
