

freelance web developer freelance web developer Front-end web developer Los Angeles, CA My fields of knowledge include environmental studies and front-end web development. My expertise in the field of environmental studies comes from my education in UCSB, which i graduated from with a B.A. in Environmental studies. I am well versed in sustainable development, LEED design and requirement, and solutions that will restore and sustain the health of our planet. I have worked on complex projects that include building and designing websites, video games, interactive resumes, restoration projects, and agriculture in which i assisted in the management of a dairy farm that included other cattle.
