

Database Administrator Database Administrator Database Administrator - St. Francis Hospital
Columbus, GA Work Experience Database Administrator St. Francis Hospital July 2012 to Present
Build and deployed SSIS packages using SSIS 2017, SQL Server 2017, Visual Studio 2015, and
the SSH.NET library (C#) to automate the secure transfer and retrieval of payment and collections
files via SFTP to over 30 different vendors Built and deployed custom reports using Cerner's CCL,
Discern Analytics 2.0 (DA2), and Power Insight (Business Objects) Work extensively with T-SQL
and SSRS to provide data to directors and practices Set up communication and jobs between
SQL Server and Oracle (via ODBC and Linked Servers) to aggregate data and provide reporting
data to Billing Office Build web applications with ASP.NET, C#, and SQL Server where SSRS
would not be sufficient Successfully aggregated and removed duplicates for ~140,000 patient
demographic records from 3 separate EMRs (Allscripts, NextGen, Greenway) for import into Athena
Maintain and administer 60 SQL Servers with versions ranging from SQL Server 2000 to SQL
Server 2017 Install, configure, maintain, and upgrade SQL Server instances/clusters, SSIS,
SSAS, and SSRS on production servers Client Server Software Analyst Lead TSYS May 2011 to
July 2012 Customized SSIS to produce Excel 2007 output Architected solution to move large
collection of text files into SQL Server, perform comparisons, and generate difference reports
Installed and maintained SQL Servers in development and production environments Converted
existing MS Access applications to ASP.NET/SQL Server applications Mentored junior team
members regarding SQL Server, T-SQL, SSIS, and SSRS Senior Database Administrator Lockheed
Martin September 2009 to May 2011 Designed, implemented, and maintained database backup
plan for 13 production SQL Servers Participated in all aspects of SQL including building custom
queries, stored procedures, and triggers; creating and repairing reports using SQL Server Reporting
Services, and building data transformation services using SQL Server Integration Services
Implemented mass migration of databases from SQL Server 2005 to 2008 Built web applications
using ASP.NET 3.5, C#, and SQL Server 2005/2008 Programmer Kelsey Advertising and Design
September 2008 to August 2009 Developed applications using PHP5, MySQL 5, JavaScript, and
AJAX Implemented custom PDF reports for clients using PHP, SQL, and Fytek Software

Performed general database duties such as table and view creation, custom queries, query optimization, and indexing. Performed on-call duties to repair and bring failing production code back online. Education Masters of Science in Information Systems Aspen University - Denver, CO March 2011 Bachelor of General Studies in Computer Information Systems Radford University - Radford, VA December 2003 Skills DATABASE (10+ years), MS SQL Server 2017, 2014, 2012, 2008 R2, 2005, 2000 (10+ years), MYSQL, ORACLE 10G, 11I (5 years), SQL (10+ years), AJAX, ASP, CSS, ASP.NET, SQL Server Reporting Services (SSRS) (8 years), Visual Studio (10+ years), HTML, XML, LINUX, UNIX, DBA, Sql Db, Sql Database, Oracle Database, Microsoft SQL Server (MSSQL) (10+ years), PL/SQL (5 years), .NET Framework (10+ years), Cerner Command Language (CCL) (1 year), Discern Analytics 2.0 (1 year) Additional Information Microsoft SQL Server 2008, Implementation and Maintenance 70-432
