Project: Project Name: Lets Drive Along Software Engineer Proclan Solutions Pvt Ltd - Pune, MAHARASHTRA, IN November 2015 to Present Skill Set: Platforms: Windows Family Web Technologies: HTML, Django RDBMS: MySql Language: Python, C Project: Project Name: Financial Information Monitoring Organizer Developer Proclan Solutions Pvt Ltd November 2015 to October 2016 Tools: Python, MySQL, PyCharm, Django Team Size: 6 Description: Lets

Drive Along is a social networking site through which people can meet up for sharing their ride with in the city. Lets Drive Along is also known as vehicle-sharing and ride-sharing. The main intention of this site is, if you have a vehicle split costs by offering vehicle pools. If you don't have a vehicle, use the system to find a vehicle pool. Through this a Ride Sharer can share his ride with Ride Seeker and Ride Seeker can share a ride with the Ride Sharer. By sharing a ride we can save gas, money and reduce auto emissions and also meet new friends. Lets Drive Along's main motto is to control Pollution, parking, traffic and road maintenance. People can share experiences as well as expenses and help each other. Moderators here work hard 24/7 to provide the services and at the same time maintain the user database very securely and updating it regularly. Lets Drive Along will only be used by IT/ NON-IT professional's so as to ensure the safety and security of the entire site users. It contains three main modules Ride Sharer (provider), Ride Seeker requestor), and administrator.

Responsibilities: Provide full life cycle support to clients from initial requirements analysis through design, coding, testing, debugging, release management and integration. Developing the web application using Django framework. Django framework for the Python objects persistence in database. Developing the User interfaces using Html, CSS. Running unit test cases according to requirements. Making day to day changes in the project fixing reported bugs and writing script.
