

Front- End Developer/Designer Front-End Developer/Designer Dynamic Web Designer & Developer
Washington, DC Passionate about creating beautiful, dynamic, cross-browser functioning websites with a simple and user-friendly interface. Brings over five years of managing the design and development of large-scale websites, creating content and interactive tools, and optimizing the user experience with an emphasis of increasing website traffic. Well-rounded in front- end development technologies with a keen eye for design. One of my sites received a 2015 White House Award for Customer Service. Authorized to work in the US for any employer Work Experience Front- End Developer/Designer Aptive Resources - Alexandria, VA 2018 to Present Web Developer Hilton Hotels International - McLean, VA 2018 to 2018 Part of Hilton s in-house creative agency, developing digital and print templates for on-property collateral in 34+ languages. All products are completed to client specifications, ensuring that hotel owners have access to all the resources they need to operate their hotels. Create UI pages and customizable document logic using a mix of scripting technologies and libraries like JavaScript and jQuery and front- end frameworks like Bootstrap. Work as part of a dynamic template development team; accurately test and correct projects completed by other members of the team through code repositories and bug tracking tools like Git, Target Process, and Jira. Collaborate daily with the business and project delivery teams to ensure content, campaigns, releases, and infrastructure are aligned with the development teams output. Front End Web Developer/Designer U.S. Department of Veterans Affairs - Washington, DC 2014 to 2018 Lead front- end designer and developer of easy-to-use and accessible UI pages with HTML5, CSS3, JavaScript, and jQuery technologies. Created the award-winning Veteran Entrepreneur Portal that resulted in a 78% increase in user portal utilization. Generated 1713% more visits by Veterans. Introduced new web page concepts and developed web request forms to ensure productivity and that projects are completed to deadlines which resulted in 25% less errors during production. Followed design specifications to develop front- end responsive web applications accessible to a wide range of browsers, devices, and audiences. Built the web style guides to ensure high-quality web design and consistency, highlighting appropriate fonts and colors to tone of voice, photographic content, and key branding aspects. Quality assurance, A/B testing,

adherence to Section 508, and troubleshooting web pages that led to significant user experience improvements. Web Content Specialist U.S. Department of Education - Washington, DC 2012 to 2014 Created content, managed, and maintained multiple high-traffic public-facing website publications. Collected and analyzed web site traffic statistics which improved customer engagement. Created and managed multiple social media accounts including Facebook, YouTube, and Twitter.
