

Front End Developer Front End Developer Chicago, IL Work Experience Front End Developer  
perficent August 2018 to Present Full stack web developer with more than eight years of  
progressive experience working on a wide range of challenging projects. Strong interest in modern  
JavaScript technologies, particularly the MEAN stack. Front End Developer August 2018 to  
Present Responsible for developing medium to large scale commercial websites for big pharma  
and healthcare clients using modern JavaScript tools/frameworks, Drupal 8, Acquia, Pantheon,  
WordPress, MAMP, Git, SCSS, and NPM among other technologies. Work comfortably in a  
fast-paced ISO-9000 compliant development environment with strict deadlines and strong oversight.

Developed custom web applications using Vanilla JavaScript, jQuery, and Angular. Developed  
custom WordPress websites without the use of themes or templates. Worked on concept web  
apps using Angular 6, Ionic 4, Capacitor, Node.js, and Express.js. Was assigned a lead position to  
explore the latest single page web technologies and to implement the MEAN stack as our primary  
development bundle. Senior Front- End Developer January 2015 to August 2018 Responsible for  
designing and developing business websites using JavaScript, HTML5, CSS3, jQuery, PHP,  
WordPress, and SVGs. Led the effort to employ responsive design methods and tools including  
media queries and jQuery Mobile. Assisted with sales, consultations, and client relations. Made a  
significant contribution to the growth of the company and improvement in client satisfaction which  
led to an increase in referrals. Streamlined and improved our online marketing services including  
SEO, SEM, email marketing, video production, content creation, and social media which had a  
positive impact on revenue growth. Participated in the hiring, training, and management of  
employees. Front End Developer Rocketforce.NET - San Diego, CA May 2010 to January 2015 In  
charge of all front- end development and design projects. Took the lead on designing and pricing  
our web development and online marketing services which included custom design/dev, conversion  
optimization/analytics, SEO, SEM, video, email, and social media marketing. Improved efficiency  
and organization by streamlining workflows and processes by adopting modern project management  
and CRM technology. Contributed to a large majority of the company's growth through inbound  
and outbound sales and word of mouth. Education Bachelor's Skills Front End (8 years), JavaScript

(4 years), project management (4 years), SEARCH ENGINE OPTIMIZATION (8 years), SEO (8 years), Git, ASP, MySQL
