Projects Amazon Clone - MySQL, Inquirer, Node An Amazon like store front which would take in orders from customers and deplete stocks from a stores inventory. Created a database through MySQL that houses all of inventory. Inquirer.js to prompt the questions for the user and validate responses. Node.js to show inventory of the stores and served as a UI for the customer. Friend Finder - Express, Bootstrap, Node Fill out a survey and find out who in the database who is the closes match to you based off a users answers. Express allowed for a more interactive experience for the user. Bootstrap to create a simple yet elegant front-end design. Node.js to house the data on logic on the server. Siri Clone - Node.js, Spotify API, Twitter API, OMDB API, and File Support for reading and writing to a log.txt As the name suggests, LIRI is analogous to the iPhone's SIRI assistant, but rather than using speech, LIRI is controlled through written text. Twitter-my-tweets returns your Twitter account's 20 most recent tweets using the Twitter API. Spotify-You will utilize the node-spotify-api package in order to retrieve song information from the Spotify API. IMDb-This will output all relevant information about the movie. Using the fs Node package, LIRI will take the text inside of random.txt and then use it to call one of LIRI's comman Authorized to work in the US for any employer Work Experience Police Officer U.S. Air Force September 2011 to Present Successfully lead teams of 25 plus people. Web Developer Rutgers Coding Boot Camp May 2017 to August 2017 Assisted senior developer to manage large, complex design projects for corporate clients.
