

Web Developer Web Developer Web Developer - Vocool Technologies build a #JAMstack site with Vanilla JavaScript, custom API endpoints and a NoSQL Database. Technologies used: HTML, JavaScript, DynamoDB, API Gateway, Serverless Framework, Auth0, and TailwindCSS

pickleat.github.io June 22 - 24, 2019 Goals: build a new portfolio site with GatsbyJS.

Technologies Used: ReactJS, GatsbyJS, GraphQL, and Typography. BellaBoutiqueLittleRock.com

March 2019 - Present In-Progress. eCommerce store built on Shopify. Work Experience Web Developer Vocool Technologies June 2018 to Present Worked on small-team of developers in the Amazon Web Services Ecosystem writing NodeJS. Built two of the company's production APIs independently one included a stateless user invite and sign-up flow minimizing redundant user accounts. Collaborated on several other APIs. Current project, protecting API endpoints with outside User-Management System Auth0.

CoffeeCodex.co January 2019 to June 2019 Side project born out of my passion for specialty coffee and my desire to remember coffees. Co-Owner Blue Sail Coffee August 2015 to May 2018 Built eCommerce coffee subscription on Shopify using ReCharge Application, allowing the company to grow its reputation with a larger online presence.

CrossWalk Family of God July 2012 to May 2016 Content creation and edits of website on Wordpress
