

Senior SharePoint Developer Senior SharePoint Developer Senior SharePoint Developer Silver Spring, MD Authorized to work in the US for any employer Work Experience Senior SharePoint Developer DOD - Defense Health Agency - Silver Spring, MD August 2017 to September 2018

Software Programmer 5 (Senior SharePoint Developer): Extended the SPD list-based onboarding workflows that existed. Brought DCoE up to speed with best practices by introducing Dev, Staging and Prod environments vs. just Production once I arrived. Integrated MS Project server with SP 2013 and a WF server for scalability. Mentored and collaborated with junior developers for coding techniques, the certification process, and IT career strategies. Responsibilities: Modified Workflows with SPD 2013 and MS InfoPath 2013 as the forms tool. Extensively documented the new onboarding / offboarding tool and its multiple workflows along with the reporting capabilities which leveraged Excel data links to SP lists. Assisted with MS Project Server installation, configuration and integration with SharePoint farm. Worked with SP Architect to create new Dev and Staging environments. Imported data into SP Lists and create applications from these (reuse key lists across apps). Procured Powershell scripts available online to export a list of all permissions to sites since we lacked a data migration tool. After DCoE merged with DHA-J9, assisted with the creation of the new root level web application devoted to volatile (workflow-heavy) site collections and cleaned up the Information Architecture structure. Granted permissions and access as needed.

Senior SharePoint Developer CAMBER Corporation - Washington, DC September 2016 to March 2017 Senior SharePoint Developer for US Courts moving 50+ on-premises farms to 0365 cloud on a team of 12. Gathered requirements, interviewed courts, reviewed podcasts of courts using SP now for major needs. Created site templates for District Courts, Bankruptcy Courts, Probate Courts and Appellate Courts. Designed and developed SharePoint Add-ins, using Javascript / JQuery / REST API for implementing custom lists and web parts upon site creation, using OnActivation method with a Remote Event Receiver. Wrote GAP analyses for SP Online vs. SP Server 2013 and SP Server 2016. Participated in the formation of SharePoint governance documents and project plan estimates. Created a SP "marketing website" to notify courts of status of project, which courts would be part of pilots, etc. Sr. SharePoint Architect

US Army Combat Readiness Center - Bering Straits - Fort Rucker, AL May 2015 to September 2016

Software and SharePoint Server Architect for CRC Safety Section upgrading SP 2010 to 2013 with extensive new branding. Completed upgrade in September 2016. Developed several custom CEWP, Search-Driven and Calendar web parts ported from O365 sandbox. Project among the first for DOD / Army SP 2013 projects, a huge jump from SP 2010 Foundation. Wrote HTTPHandler to connect into IMS for single sign-on capability. Implemented event receivers in Visual Studio 2013 to assign item-level security permissions. Performed scripted install of SP 2013 VM s and configured service applications. Developed 3 primary SPD workflows for timekeeping, purchasing, and training areas. Designed and implemented list-based Training application which was backbone for safety ops. Coordinated with A/D admins to import the users into SP 2013. Collaborated with local networking admins to get new SP 2013 site whitelisted by going through the lengthy Points and Protocols process. Performed demos along the way as the project was being developed; wrote the project plan in MS Project 2013 and updated milestones as these changed. Assisted with DISA network security audit of the CRC in summer of 2016.
