

Sr. DRUPAL DEVELOPER Sr. DRUPAL DEVELOPER Sr. DRUPAL DEVELOPER - Kaiser Permanente Philadelphia, PA Drupal Developer with over 10+ years experience working on migration and other web and API development projects. Developed and launched several Drupal websites, maintaining new and existing websites and providing technical assistance for troubleshooting and upgrading. Developed and launched several Drupal websites, maintaining new and existing websites and providing technical assistance for troubleshooting and upgrading. Migrated existing websites to the latest versions of Drupal platform with advanced 512 bit encryption for pages. Expertise in all areas of Drupal including Views, CCK, Drush, Cron, Custom Module and worked closely with securing additional resource for the team. Ability to develop and deployment of multi-tiered web based enterprise applications using PHP technologies like PHP, MEAN Stack, Laravel, Zend, Symphony, LAMP, JAVA, SQL, CakePHP, Yii, MQ Series, JavaBeans and Web services (SOAP). Capability in designing the applications by applying OOAD principles and developing UML diagrams, like Use case diagrams, Class diagrams, Sequence diagrams and etc using Rational Rose, Power Designer and Microsoft Visio. Strong experience in development of Test Driven Development and have used PHPUnit, SimpleTest and Codeception. Migrated existing websites to the latest versions of Drupal platform with advanced 512 bit encryption for pages. Proficient in client web technologies using HTML5, DHTML, CSS3, JavaScript, GWT and JQuery, AJAX. Experienced in working with PHP based server API's using Zend2, Cake, Laravel, Yii, Symphony framework and MVC architecture. Skilled with Version Control like Git, Subversion, AccuRev and Maven. Worked with several frameworks like Struts, JSF, Hibernate, spring with GUI plug-ins like Tiles Framework, validation plug-ins like Validator Framework. Hands-on experience on different kinds of databases Ms-Sql Server, Oracle, DB2, UDB, Mysql, Hypersonic databases and proficiency in writing complex SQL, PL/SQL developed Stored Procedures, Triggers, Functions and Packages. Excellent analytical, communication, organization and time management skills very good experience in programming & problem solving. Authorized to work in the US for any employer

Work Experience Sr. DRUPAL DEVELOPER Kaiser Permanente - Chicago, IL September 2017 to Present Responsibilities: ? Built PHP applications to meet product requirements and satisfy use

cases using MVC architecture, Codeigniter Framework and Drupal CMS. ? Developed the Vendor Compliance, Vendor Survey, Vendor management, Dashboard modules. ? Developed form modules using HTML 5, Bootstrap3, Select2, Validators and Laravel Collective for input controls. ? Setup the REST services for Drupal to access the external (non-Drupal) database. ? Added model and controller (MVC) for the new database tables so that REST services can access (Update, Create and Delete etc.) ? Developed new modules for the Drupal depending upon the requirements. ? Created different Drupal Admin pages, nodes etc. ? Implemented new modules and themes into Drupal core to allow for rapid development. ? Used HTML, CSS, JavaScript, JQuery and Ruby on client side. ? Developed the middleware software components for the implementation of the Data Entry GUI for creating and editing medication instances using client side technologies viz. HTML, CSS, JavaScript ? Worked in Agile based environment with daily scrum calls and coordination with the offshore team. ? Worked on various no. of frameworks such as Wordpress, Joomla, Symfony, and Codeignitor, Smarty. ? Developing JIRA plug-in for custom user management. ? Developed and implemented search feature using PHP and Ajax patterns using asynchronous script loading. ? Providing a responsive, AJAX-driven design using JavaScript libraries such as jQuery, AngularJS, Backbone.js and Bootstrap.js - Using Subversion (SVN) for version control. ? Experience in developing application, automated scripts leveraging MongoDB. ? Functionalities include writing code in HTML, PHP, CSS, JavaScript, JQuery, Angular JS, Bootstrap framework and testing the functionalities using PHPUnit ? Cloud Computing: Migration and maintaining Drupal sites in Acquia Server. ? Extensively worked on PHP5, MySQL, Python, OOPS, Design Patterns, HTML5and CSS. ? Used Drupal Programs in PHP (among other languages) and Sugar CRM 6.5.x. ? Implemented Workflows, Active Directory, Social media integrations. ? Built Web Services APIs to integrate other Apps with Drupal. ? Worked on Linux and UNIX platforms. Also worked with XML, XSD, and RESTful APIs ? Worked on application maintenance and enhancement using PHP Framework, Object-Oriented Design Patterns (OOD) and MVC methodologies. ? Involved in Jenkins java plugin development, IT provisioning recipes, code configurations like GIT. ? Involved in the development using Drupal, AWS and PHP. ? Used

JQuery for creating different menus and dialog boxes and also used different JQuery plugins for calendar, calculator and printing options. ? Increased developer productivity by using efficient programming methodologies and local development. ? Wrote cross browser compatible based CSS codes for styling the pages and menu bars. ? Carried out extensive verification and testing in order to set MYSQL database free from SQL injections throughout course of database development and management. ? Built AJAX pages using PHP to display current server time ? Converted all user facing applications from Cold Fusion to PHP. ? Wrote front end HTML and CSS to meet validation requirements. ? Maintained 24/7 high volume availability demands using open source tools such as Linux, Apache, PHP, and MYSQL. ? Played a key role in guiding the company's marketing strategy and overall direction, which lead to its significant market share and successful buyout. ? Created a marketing platform for promoting the business that became an industry standard. Environment: PHP, Drupal, MEAN Stack, Laravel, Zend, Symfony, LAMP, JAVA, SQL, CakePHP, Yii, MQ Series, JavaBeans, Web services, Linux distribution sys Ubuntu LTS, Java, WACG, HTML, DB2 XHTML, CSS, AJAX, Apache Web Server, JavaScript, SVN, Notepad. Sr. DRUPAL DEVELOPER Dow Jones Market - Fulton, MD January 2015 to August 2017 Responsibilities: ? Designed and maintained Web forms and Banners using PHP and Laravel Framework ? Used Heroku for hosting PHP application, Data exchange with third party using PHP/XML ? Used PHP, HTML and JavaScript webpage coding integrated with MySQL using Apache HTTP and Optimized PHP project running on Symfony framework ? Developed Drupal custom themes programmed many hooks. ? Developed test web site using DRUPAL Frame work before the final implementation ? Trained other programmer of Drupal Architecture and work flow. ? Enhanced exiting website using PHP, MySQL, RESTful APIs, HTML, XHTML, Oracle, jQuery, CSS, AJAX, JavaScript and XML etc. ? Worked in MVC frameworks like ZEND, CakePHP, and CodeIgniter as well as web environments such as CCK, Views, Drush, and agile Development. ? Joomla and DRUPAL application, ASP.net And Ajax ? Worked with major PHP frameworks such as CodeIgniter, Zend, etc. ? Extensive Drupal experience and active in the Drupal Community attending and presenting at conferences and camps, developing new modules, and offering support to other users and developers. ?

Implemented a caching feature to cache static web pages in memory using XML and PHP ? Integrated and configured the Lucene search engine for PHP application ? Developed and maintained code in PHP backend using codeigniter. ? Designed CSS3 based web pages, which were cross-browser compatible. ? Created screens with table-less designs meeting W3C standards. ? Implemented Presentation layer using CSS Framework, Wire-framing, and HTML. ? Involved in Requirements and Analysis Understanding the requirements of the client and the flow of the application as well as the application Framework. ? Designed and Developed User Interactive (UI) of Web pages with the help of HTML, CSS, JavaScript, jQuery and AJAX. ? Wrote various PHP scripts in the header, footer, multiple contact pages, etc. ? Implemented LDAP/Active Directory authentication module with ACL (Access Control List) using YiiFramework ? Designed and developed lots of custom WordPress codes, themes and plugins. ? Unit testing was performed using JUnit and Version control. ? Utilized new software methodologies to be able to adapt to changes in requirements quickly. ? Used the Unit Testing, to test the individual units of AngularJS code. Also, used Karma and Jasmine. ? Debug the application using Firebug to traverse the documents and manipulated the Nodes using DOM and DOM Functions. ? Used various Drupal tools including Drush, Memcache, Views and also Developed Custom modules and Drupal templates. ? Involved in developing XML, HTML, and JavaScript for client side presentation and data validation on the client side with in the forms. ? Logo and brand identity design, marketing material development for print and online outlets, animated web Design, e-newsletter templates, responsive web design and development for clients throughout multiple industries. ? Worked on server-side scripting JavaScript framework Node.js, Express.js, created Rest API's using Node.js and connected to MongoDB. ? Implemented XML parsing and JSON parsing for data handling on different application. ? Designed PDF, Excel and Print previews for all the reports in the application using HTML, JavaScript and SQL Stored Procedure. ? Involved in write application level code to interact with APIs, Web Services using AJAX, JSON and XML. ? Understanding of application development lifecycle methodologies. ? JavaScript MVC Frameworks Angular JS and Backbone JS. ? Performed Unit & Integration Testing after the completion of tasks. ? Experience in working

on GIT, UI Development using Angular JS and Bootstrap on HTML. Environment: PHP, Drupal, HTML, CSS, JavaScript, jQuery, Unit testing, Bootstrap, Ajax, XML, JSON, Junit, Graphic Design, React JS, SQL, AWS, Amazon Lambda, Tomcat Apache, Node js, Maven, Eclipse IDE. PHP DEVELOPER Ernst & Young - Atlanta, GA April 2013 to December 2014 Responsibilities: ? Developed PHP routes and Authentication to extend the functionality of the server. ? Resolved and identified issues related with PHP development to different customers varying from senior managers to varied technical personnel. ? Work on implementing Single Sign on Service (SSO) by implementing Web Services. ? Developed data access module, wrote queries through built-in query builder and Eloquent in Zend framework. ? Used twig for templating the views and binding parameters from the controller. ? Developed WordPress plugins and modules to embed into the active pages using PHP ? Developed an efficient Administration module to manage the portal dynamically ? Responsible for installing, configuring and maintaining Codeigniter, PHP, Apache and MySQL on AWS Cloud Servers. ? Developed a powerful and effective diagnostic search for internal employee ? Developed the application using PHP, HTM, JavaScript, MySQL and Apache server ? Experience of working with Relational Databases (MySQL, MSSQL) (queries, design and normalization) ? Integrated Zend framework into the Back End of the project ? Worked to call REST services (JSON) from client side ? Used LAMP for hosting the WordPress application ? Developed reusable and interoperable Web service modules based on SOA architecture using SOAP and RESTFUL ? Developed the service layer, a layer that acts a bridge between the presentation layer and data access layer, with Spring framework. ? Expertise with NoSQL databases like HBase, Cassandra, Dynamo DB (AWS) and MongoDB. ? Developed PHP Worked on CAS module for Single sign on Authentication ? Worked on developing the web services classes, WSDL using Apache Axis. Developed Web Services to retrieve data from legacy systems. ? Involved in the analysis, design, development, testing and maintenance phases of Software Development Life Cycle (SDLC) of benefit shift Project. ? Developed web services components using XML, SOAP and Axis. ? Developed the view-controller components using Servlets/JSPs, JavaScript, CSS, Web services, and DHTML ? Creation of database objects like tables, views,

stored procedures, materialized views and packages using oracle tools like PL/SQL developer. ?

Developed the JSON structure for the data transfer in between the Goggle Web Toolkit (UI) and business tier. Environment: PHP, MYSQL, JavaScript, AJAX, HTML, DHTML, CSS, Linux, MS Word, MS Excel, DOM, Drupal, CodeIgniter Framework, Adobe Photoshop, LAMP and WAMP.

JAVA DEVELOPER Novartis - San Jose, CA October 2011 to March 2013 Responsibilities: ? Used Asynchronous JavaScript Technology and XML (AJAX) for critical front-end validations to reduce the burden on the server side. ? Used Maven as a build and deployment tool. ? Involved in various phases of Software Development Life Cycle (SDLC). ? Used Rational Rose for the Use Case Diagrams, Object Diagrams, Class Diagrams and Sequence ? Diagrams to represent the detailed design phase. ? Front-end is designed by using HTML, CSS, JSP, Servlets, JSTL, Ajax and Struts. ? Involved in developing the CSS sheets for the UI Components. ? Involved in writing the exception and validation classes using Struts validation rules. ? Persistence layer was implemented using Hibernate Framework. ? Used JavaScript for the web page validation. ? Created Servlets which route submittals to appropriate Enterprise Java Bean (EJB) components and render retrieved information. ? Developed various EJB components to fulfill the business functionality. ? Developed Session Beans to process requests from the user and used entity beans to retrieve and update customer information. ? Used Apache Axis for consuming Web Services. ? Written ANT scripts for building application artifacts. ? Monitored the error logs using Log4J and fixing the problems. ? Used XML with SAX parser to transfer data between applications. ? Wrote PL/SQL stored procedures, Prepared statement and used API. ? Created Unit, Acceptance and Integration Test Documents and Code Review Documents. ? Used WebSphere Application Server for deploying various components of application. ? Involved in writing and executing stored procedures, functions and triggers for ORACLE to create a Database Management System. Environment: Java, J2EE, Servlet, JSP, JSTL, Spring Core, Spring MVC, Hibernate, Struts Validation, JUnit, XML, XSD, XSLT, XPATH, XQuery, DOM/SAX, Web Services, SOAP, Apache Axis, Log4j, JUnit, JibX API, HTML, DHTML, JavaScript, AJAX, DOJO, Tomcat, MySQL, Eclipse, Maven, SVN, Windows XP, LINUX.

JAVA DEVELOPER Bank of America - Charlotte, NC January 2010 to September 2011

Responsibilities: ? Developed the modules of Purchase Request, Purchase Order, Item Master modules. ? Involved in the Enhancement of Summarization module. ? Developed the web pages using JSP, CSS and HTML ? Used several J2EE Design Patterns (Session Facade, Aggregate Entity) for the Middle Tier development. ? Responsible for an extensive understanding of Health Level 7 (HL7), the national standard for public health entities for health messages ? Developed ANT scripts to build and deploy the application in the JBOSS Application Server. ? Made extensive use of Java Naming and Directory Interface (JNDI) for looking up enterprise beans. ? Used JSON for data exchange between application modules along with XML. ? Wrote various stored procedures in PL/SQL and JDBC routines to update tables. ? Developed Form Beans, which are used to store data when the user submits the HTML form. Environment: Java, J2EE, Spring Framework, JSON, Flex, Action Script, MXML, XML, Mule ESB, Java script, IBM RAD, ClearCase, Daeja ViewONE Pro, Oracle, Log4j, Tomcat server, Sql, Toad, Apache CXF, Junit, EMC Documentum, CMIS, GWT, Webservices, XML, SOAP, WSDL, Agile, RTC Eclipse Client, UML (Rational Rose), HTML, CSS and Windows XP Software DEVELOPER TCS - Bengaluru, Karnataka August 2008 to December 2009 Bangalore, India Responsibilities: ? Implemented the design patterns like Session Facade, Business Delegate layer, Singleton Pattern and Service Locator for both the applications. ? Developed presentation layer (Struts, JSPs) and persistence (EJBs). ? Using Java Excel API - open source Java API, developed EJBs Stateless session beans which would generate reports as excel spreadsheets from web requests for hedge fund clients to view/print analytics for the securities that make up the portfolio. ? Identified Performance issues in existing code and provided solutions. ? Unit testing, System testing and releasing fixes. Supporting the application in Dev, QA, UAT and production environment. Environment: Open Source J2EE Tools/Frameworks (Jakarta Struts, Ant, Java Excel API, JUnit, Log4j), J2EE (EJB, Servlets, JSP, JDBC, JNDI), XML, XSL, JavaScript, IBM WSAD /Websphere Application Server, Microsoft Visual Source Safe, Oracle, Solaris, Windows NT. Education Bachelor's Skills XML (10+ years), ORACLE (9 years), HTML (8 years), SQL (8 years), AJAX (6 years) Additional Information TECHNICAL SKILL SET Operating Systems: Windows NT/2000/XP/2003, UNIX, Linux, Solaris, DOS, AIX 400, WIN 9x-2000 and WIN NT. Languages:

Java, Objective C, C, C++, VC++, PL/SQL, COBOL, Shell Scripts, Pascal, Beans and Java Comm. API. RDBMS: Oracle, MS SQL, MS Access, Sybase, DB2, IMS, postgresql Front Ends: Visual Basic, C#.Net, VB.Net Scripting Languages: XML, (D) HTML, VB Script, CGI, Perl, PHP, Java Script, Ajax, Dojo, GWT Web Technologies: Drupal, ADO.Net, Servlets, JSP, JSF, Seam Web/Application Servers: IIS, WebLogic, WebSphere, JBoss, Tomcat, iPlanet, SunOne, iPlanet Apps Distributed Technologies: EJB, RMI, DCOM, COM, SOAP Tools: Rational Products, VS IDE, JBuilder, Eclipse, SQL*Loader, Import/Export, Toad & Crystal Reports, Net Beans, Maven, My Eclipse IDE, Struts, Spring, Hibernate, StarTeam, CVS, SVN, SourceSafe, Actuate, Jprobe, Parasoft, Drools, Jtest, Visio, XPlanner, ScrumWorks Pro, TAME, Blaze, JRules. Protocols: TCP/IP, UDP, SMTP, FIX, POP, FTP, HTTP, RSTP, DSPF, IPTV, SSH, SIP, IM, LDAP
