

Front- End Developer Front-End Developer Front- End Developer San Francisco Bay Area, CA *

Over 7 years of extensive experience as Front- End Web Developer specializing in responsive web design development with HTML5, CSS3, Bootstrap, JavaScript, Angular JS/2/4, jQuery, AJAX, LESS, of web products and applications. * Presenting in all phases of SDLC like Requirement Analysis, Design, Development, Implementation and Testing. * Extensively followed iterative methodologies such as Agile (SCRUM) and test-driven development in multi project implementations. * Expertise in Client-side scripting and Validations using JavaScript and jQuery. * Experience in Object Oriented JavaScript and use of design patterns like module, revealing module and singleton pattern. * Experience in using Angular, Node.JS to create a Single Page Applications (SPA), which can bind data to specific views and synchronize data with server. * Remarkable knowledge of Design, Normalization and Database Management Concepts. * Handling the response data from RESTful web services using XML, JSON and jQuery to update UI and built the task runners GRUNT, GULP in a very proficient way. * Experience in implementing Mongo DB CRUD (Create Read Update Delete) operations by using Mongoose library in Node-JS including Angular JS. * Effective skills of working with Eclipse IDE and MVC 4.0. * Specialized in Developing Web 2.0 Apps using core jQuery along with AJAX/JavaScript. * Knowledge working on developing web applications using PHP 5 and MySQL, SQL Server. * Have Knowledge in developing Drupal custom modules in Drupal 7 version. * Good understanding of Document Object Model (DOM) and DOM functions. * Have knowledge on Core Java with strong understanding and working knowledge of Object Oriented Concepts like Collections, Multi-Threading, Exception Handling, Inheritance and Polymorphism. * Proficient in using different IDE tools like Eclipse, NetBeans for successful implementation of my projects. * Present as a team player, quick learner, self-starter with effective communication, motivation and giving 100% with the positive thinking in exploring new technologies.

Work Experience Front- End Developer Charter Communications, St.Louis September 2015 to April 2016 * Implementing the GUI layer and internal communication in web applications. * Designing and Developing the user interface Web Applications, Single Page Applications and Client- Server technologies using Angular2, DOM, JavaScript including the AJAX controls and XML for

event-driven applications. * Worked on Virtual DOM, creating interactive and reusable UI components. * Implementing Node JS to improve the server-side logic, maintain the centralized database and ensure high performance and responsiveness to request. * Writing the properties, methods in class modules and webservice. * Working on the Mongo DB schema design, store JSON data and retrieve from database using Mongoose drivers. * Update database information using Node JS and Mongo DB. * Optimized SQL queries on database for creating, storing, retrieving and deleting. * Search Engine Optimization (SEO) techniques for the web applications and implementing the custom validation controls with JavaScript validations and webservice for transmission of large blocks of JSON data. * Designed good background working in Wireframes, Prototypes and Mock- ups. * Application level code of writing to interact with the APIs, AJAX, and jQuery and running the standalone in Grunt server. * Maintaining the documentation, code assistant in application design. * Performed unit testing using Karma to increase the performance of the application.

Environment: JavaScript, Angular 2, jQuery, HTML5, Mongo Db, Node JS, DOM, MVC, AJAX, Grunt, Jasmine. Front- End Developer TCS - Hyderabad, Telangana May 2013 to August 2015

* Developed the Front- end systems with JavaScript, Bootstrap, HTML5, CSS3 and MVC frameworks such as Angular JS. * Experience in developing Reactive Single Page Applications (SPA) using AngularJS with expertise in creating User Controls, Web Forms and performing client-side validations using JavaScript, jQuery. * Created custom directives in Angular JS to re-use components in various parts of the application. * Worked on Angular resources for all data access, encapsulating URLs and standardizing data access interfaces. * Expertise working with Apache Tomcat Application Server * Designed and developed HTML Wrappers using HTML5, JavaScript and CSS3. * Experience working on scalable environment using Agile/SCRUM methodologies * Developed web page quickly and effectively using jQuery, HTML5, CSS3 and in making web pages cross browser compatible and resolving cross browser compatibility issues. * Involved in designing and developing the XML Objects Used AJAX to send request to the server to check the functionality of the websites and established a JSON contract to make a communication between the JSP pages and java classes. * Excellent analytical, problem-solving and

communication skills. Proactive and innovative team player proven to work under tight deadlines, capable of developing multiple projects and can work efficiently as an individual. * Experience with Grunt task runner which helps automate repetitive tasks. * Experience in configuration management systems like GIT-HUB Environment: JavaScript, Angular JS, jQuery, HTML5, Apache server, Grunt.

Front- End/UI Developer Ericsson, Madhapur - IN August 2011 to May 2013 * Developed web pages using HTML5, JavaScript, DOM, JSON, jQuery and AJAX. * Designed and developed the layouts using CSS3, Box model and HTML 5. * Extensively used Debugging Cascading Style Sheets CSS to change the styles now and in the future. * Created Angular components like controllers, services, directives and forms to collect different user data and implemented form validation in Angular JS. * Extensively involved in various phases of Software Development Life Cycle such as Requirements Analysis, Design and Implementation and Maintenance. * Designed dynamic client-side JavaScript codes to build web forms and simulate process for a web application, page navigation using Angular. * Customize reusable, and testable Angular Services to manipulate data from Web API through HTTP Client. * Responsible for implementing Business logic based on user selection using jQuery, AngularJS for all client-side UI Validation. * Follow up with the development team on the improvements, integration and further enhancements in the website. * Involved in Agile methodology, monthly Sprints, and daily Scrums to discuss the development of the application. * Implemented Angular Client-Side Validation using Template-driven (ngModel) and Web API server-side validation using Data Annotation. * Implemented Unit Test by using Jasmine and Karma throughout application development phase. Environment: Angular JS, npm, Bootstrap, HTML5, CSS3, Bootstrap, JavaScript, AJAX, DOM, JSON, jQuery Education Bachelor's in Computer Science in Computer Science Osmania University 2011 Skills VISUAL STUDIO, ANDROID STUDIO, Git, HTML, JAVASCRIPT Additional Information Technical Skills: Web Technologies: HTML 5, DHTML, XHTML, CSS3, JavaScript, TypeScript Bootstrap, JSP, jQuery, JSON, AJAX, XML, Node JS, React JS, Angular JS 2,4,5. Databases: MySQL, SQL server, Mongo DB. IDE & Tools: Eclipse, Sublime Text 3, WebStorm, Visual Studio, NetBeans, My Eclipse, Android Studio. Servers: Apache Tomcat, Maven, IIS 7.0. Proficiency: Web Development, Testing, Scrum, Agile

Methodologies. Other tools: GIT, SVN, Jenkins, Jira.
