Lead performance tuning database administrator providing database and application performance tuning recommendations. Extensive use of Enterprise Manager, ADDM and AWR reports to help diagnose performance problems. Lead database administrator participating in a proof-of-concept of the Oracle Database Appliance (ODA) to determine and recommend the use of engineered systems for new Oracle database applications we

deploy. Created physical standby databases on a remote DR database server located in the Czech Republic for our U.S. production Financial databases located in Westerville, OH. Due to high network latency times between the primary and standby sites, I had to take advantage of some advance features in Data Guard such as parallel remote archiving to reduce the amount of time to transfer archive redo logs. Wrote RMAN backup scripts to create physical standby databases from a RMAN disk backup of the primary databases using the RMAN duplicate command. Senior Oracle Applications Database Administrator McGRAW-HILL EDUCATION - Columbus, OH 2000 to 2005 Responsible for administration, maintenance and performance tuning and capacity planning of the Oracle databases for the Oracle Applications 11i ERP suite. Lead application/systems DBA of the APS Oracle Application that encompasses both ASCP and ODP using Express Server. Oracle Enterprise Manager (OEM) system administrator responsible for all maintenance and scheduling of events and jobs to pro-actively monitor the Oracle databases and generate appropriate alerts if problems or potential problems are detected. This minimize unplanned downtime of the production systems and provided the highest possible availability of these systems.

Wrote automated procedures utilizing UNIX shell scripting and PL/SQL. Responsible for making database backups, database cloning and performance tuning of the applications and databases as well as provide end user support. Involved in Disaster Recovery planning and implementation using Oracle Dataguard and RMAN. Senior Oracle Database Administrator METATEC CORPORATION - Dublin, OH 1998 to 2000 Responsible for administration, maintenance and performance tuning of both Oracle and SQL/SERVER databases. Six production and eight test/development Oracle databases on five HP9000 UNIX servers. Implemented PeopleSoft Financials/Manufacturing modules, tuned SQL in the application as well as tuned the Oracle database for optimal performance. Wrote several automated UNIX shell scripts for monitoring database activity and growth in order to help identify potential problems and eliminate them more quickly. Completely automated the nightly backup procedures utilizing UNIX shell scripting and PL/SQL. Managed three SQL/SERVER databases used by the Information Technology department for tracking help desk calls. Supervisor of Windows NT Level II/III Support STERLING COMMERCE

- Dublin, OH 1997 to 1998 Responsible for the day to day management of the Level II/III support department.
