

PHP Web Developer PHP Web Developer PHP Web Developer - Umass Memorial Health Care  
Worcester, MA Over 6+ years of years of extensive experience in PHP, LAMP, WAMP, Drupal,  
WordPres Symfony, Laravel, CodeIgniter, CakePHP Frameworks. Extensive experience in  
developing web page quickly and effectively using jQuery, HTML5, CSS3, Responsive Web Design,  
Bootstrap and experience in making web pages cross browser compatible. Proficient in developing  
websites and web applications using PHP, MySQL, HTML5, XML, CSS, Java Script, JSON, XHTML,  
JQuery and AJAX. Extensively used JavaScript, JQuery and Asynchronous JavaScript and XML  
(AJAX) technologies to build dynamic web contents with high performance. Strong knowledge in  
using Object Oriented Programming concepts as well as full working knowledge of DOM. Excellent  
work done in writing queries, stored procedures, triggers and functions in MySQL, SQLServer,  
Oracle, DB2 etc. Solid experience with UNIX/Linux, MVC, Subversion, CVS, Git, CakePHP,  
CodeIgniter, Laravel, Symfony Framework, and LAMP toolset. Familiarity with large multi-server  
environments, administration, and integration with various third-party sites with open APIs.  
Experience in content management systems like WordPress to perfectly suit the client's  
requirements. Expertise in Photoshop, and IDEs like Eclipse, Dream Weaver, PHP Storm.  
Extensive Experience in working on Manual Testing Methodologies like Agile-SCRUM, Black Box,  
White Box, Waterfall Methodology and Spiral Methodology. Extensive Experience in command line  
tools like Composer. Strong Analytical, Problem Solving and debugging skills with excellent  
understanding of system development metrics, techniques and tools. Extensively used the  
backbone.js, AngularJS, ReactJS frameworks, JSON and JavaScript frameworks jQuery. Working  
experience with MySQL, which includes configuration, query optimization, full-text search indexing  
and de-normalization Expert in handling the administration of MySQL database using PhpMyAdmin.

Experience programming solutions based on the AngularJs, BootstrapJs, ReactJs, BackboneJs  
and KnockoutJs. Experience in developing projects that involve JBoss, JSON, AJAX, JavaScript,  
and REST. Solid experience with Model View Controller (MVC) architecture-based Web  
Application Development. Solid experience with security aspects of website such as SQL  
injections etc. Solid experience in Relational Database Management System (RDBMS) design,

programming, normalization and security administration with MySQL, Oracle11g Experience in custom module / plugin development for Drupal and Wordpress. Familiar and working experience with NoSQL Database Design, Analysis and Development like MongoDB. Worked with Ubuntu server / Linux command line. Experience with integrating APIs - Google Analytics, Google Maps etc.

Usage of JSON for faster and impulsive responses. Using Bower, Grunt and NPM for project maintenance and installing the dependencies on client side. Highly motivated, reliable analytical problem solver and troubleshooter with strong attention to detail. Experience with LARAVEL, MVC, WORDPRESS, Framework and different libraries for developing applications Designed and developed relational database systems and Client/Server applications. Experience on developing which also includes web services like REST, RESTFUL API'S etc. with the help of WSDL, SOAP and JAX-WS, MongoDB and AWS to get updates from the third parties. Work Experience PHP Web Developer Umass Memorial Health Care - Worcester, MA January 2018 to Present Responsibilities:

Develops and maintains complex WordPress-based applications Implements complex features using modern PHP code and patterns while following standards Develops WordPress widgets, Plug-ins, Custom post types, and page templates. Developed user interfaces using JSP, JSF frame work with AJAX, Java Script, HTML, DHTML, and CSS. Developing a set of dashboards in Splunk 6 by leveraging Underscore, D3, JQuery/UI, Backbone, and Django. Co-developed dynamic Ruby on Rails/HTML5 application highlighting numerous data visualization of web metrics.

Created file and did Unit testing by creating Test Suites using PHP Unit, Codeception, and Jasmine

In collaboration with stakeholders worked on a school's website using HTML, CSS, PHP, and JavaScript Identify and resolve issues caused by WordPress plugins or feeds under HTML, CSS, JavaScript, PHP, and MySQL Used Agile principles such as Scrum, Continuous Integration, Pair Programming and Test-Driven Development (TDD) as development methodology. Developing presentation layer with JSP's, HTML5, JavaScript, CSS3, JQuery, JSON, AJAX, Form tags, Tiles, JSTL tags etc. Hands on JavaScript/ES6 development on Node.JS platform Experience in Hibernate which includes integrating legacy databases, writing custom CRUD statements, integrating stored procedures and functions and performed polymorphic associations. Followed

coding guidelines while implementing the application. Used GWT to write AJAX implementation of to convert into HTML and Java script automatically and to support JUNIT. Environment: PHP, WordPress, HTML, CSS, Angular.js, Bootstrap, Node.js, Mongo DB, Express, D3, JavaScript, AJAX, JQUERY, Eclipse, Oracle, MySQL, PL SQL, MS SQL, SOAP, Restful, SQL, Junit. PHP Developer Walmart - Bentonville, AR February 2016 to December 2017 Responsibilities: Involved in the maintenance of Website and application developed in Symfony2 Framework. Developed form modules using HTML5, Bootstrap3, Validators and input controls. Wrote front end HTML and CSS to meet validation requirements. Implemented new modules and themes into Drupal core to allow for rapid development. Used and Integrated MVC architectural pattern for developing enterprise applications. Used Amazon S3, Broken Link Checker, SLT File Select, Multiple content blocks plugins in the site to implement different functionalities. Used HTML, CSS, JavaScript, JQuery and Ruby on client side. Worked in Agile based environment with daily scrum calls and coordination with the offshore team. Collate functional, non-functional requirements and business requirements of applications and design the AWS cloud architecture that integrates with existing infrastructure without issues. Setup testing environment for Unit Test as well as Front end testing using PHPUnit, Selenium test cases. Back end development using Laravel, and MySQL, handle front end using HTML, SSL, JQuery and CSS. Designed and developed database with normalization techniques using MYSQL. Developed JIRA plug-in for custom user management. Used frameworks such as Bootstrap using technology like JavaScript, AJAX, JQUERY for front-end.

Involved in Jenkins java plugins development, IT provisioning recipes, code configurations like GIT. Used JQuery for creating different menus and dialog boxes and used different JQuery plugins for calendar, calculator and printing options. Converted all user facing applications from Cold Fusion to PHP. Normalized database tables and performed extensive query optimization. Followed the Agile and Scrum development methodologies. Extensively modified REST HTTP service-based client and server web applications Environment: PHP 7.0, Linux distribution sys Ubuntu LTS, HTML, MySQL, XHTML, CSS, AJAX, Apache Web Server, JavaScript, SVN, Adobe Photoshop CS, Notepad++ PHP Developer Farmers Insurance Group - Woodland Hills, CA April

2014 to January 2016 Responsibilities: Used JQuery to make the frontend components interact with the JavaScript functions to add dynamism to the web pages at the client side. Build code using IDE IntelliJ and deploy it using Apache Tomcat. Created web services using WTP tool plugin to the eclipse IDE which is deployed as a separate application using Maven scripts. Used DOJO for Ajax Support and used JSON for DOM objects Report Generation, Unit testing using PHP Unit, System, Integration and Performance testing of the application and its components. Excellent procedural skills and improving Object Oriented skills. Proficiency in Prototype, Module Design, User Interface Design, and Integration of PHP components. Installing and Configuring Eclipse and Web sphere application Server. Written JUNIT test cases for testing UI Framework classes and wrote many Java Scripts to do client-side validations Developed JSP pages for presentation layer (UI) using Struts with client-side validations using Struts Validator framework/ JavaScript. Set up JBoss Server, Configured MySQL Cluster in Linux OS and installed OpenCall XDMS. Write PHP Scripts for application logic and access database (MySQL) layer Wrote various PHP scripts in the header, footer, multiple contact pages, etc. Template Modifications in the twenty eleven themes including setting up MYSQL Database for configuration. Designed interfaces in Photoshop, Flash, NotePad++, Corel Paint Shop X2, Image Ready & Word press. Maintained and developed e-commerce website using PHP-based framework Magento, jQuery, HTML and CSS. Developed complex Web based UI using Struts Ajax and JavaScript. Responsible for both back-end programming in PHP and front-end functionality using JavaScript, Ajax, JQuery libraries, and other technologies. Designed databases and structures for various Web sites. Involved with Zend module development and customization. Worked on PHP5, HTML/CSS, Ajax/JavaScript, SVN, GIT and MySQL and Apache, demonstrating vast LAMP architecture experience. Environment: PHP, Linux, Apache, MySQL, LAMP, Word press, Magento, HTML, Ajax, CSS, JavaScript, jQuery, Bootstrap, and Git PHP Developer State Street Bank - Boston, MA December 2012 to March 2014 Responsibilities: Used HTML, CSS, JavaScript, JQuery on client side. Back end development and maintenance of websites using PHP and MySQL. Efficiently developed code for different modules by using Oracle SQL, PLSQL and Shell scripting. Worked on applications and developed

them with XML, JSON, XSL. Worked on HTML, CSS, and of digital imaging and illustration with Adobe Photoshop, InDesign, and Illustrator. Created an internal browser-based text editor using HTML, CSS, JavaScript, AngularJS. Worked with LAMP stack and open source software. Experienced in Gathering and defining user requirements, created software architecture and data models, defined criteria for system testing and defined SDLC. Used PHP to create and consume web services (SOAP, XML-RPC) and implemented data integrations within the platform. Worked with the Foundation framework and with AJAX based sites/ web applications. Developed JQuery plugin for accordions and customized them meeting the business requirements. Worked in an SVN/GIT managed environment. Worked on HTML5/CSS and jQuery in a Drupal based CMS environment. Worked on analysis, design, development and implementation of web applications using PHP, Oracle and MySQL. Created Images, Logos and Icons that are used across the web pages using Adobe Flash and Photoshop. Used advanced level of HTML5, JavaScript, CSS3 and pure CSS layouts (table less layout). Involved with front-end integration projects using various frameworks and HTML5, CSS3, JavaScript, DOM, and Ajax technologies and methodologies. Environment: PHP, MySQL, LAMP, Javascript, AJAX, JQuery, CSS3, XHTML, HTML5, Html 5, XML, XSD, Photoshop. Education Bachelor's
