

SQL Server Database Administrator SQL Server Database Administrator SQL Server Database Administrator - eBay Inc San Jose, CA Over 6+years of extensive hands on experience of SQL Server DBA with detail oriented, analytical and troubleshooting experience in multiple systems using MS SQL. Depth knowledge in data modelling, server configuration, tuning and providing 24x7 dedicated support to all Production, development and clustered servers. Seeking challenging career as a SQL Server DBA. In-depth knowledge of IT industry database technologies and processes and business applications integrated with database technologies Experience in deploying SQL Server in virtualized environment and good understanding of Operating system concepts of Windows and Linux Experienced in installing, configuring SQL Server Hands on experience in SQL Server maintaining in memory tables, column store indexes Good knowledge of capacity planning and architecture design for database server deployment, creating databases, migrating database objects from non-production to production environment Extensive experience in fine tuning of long running queries, developing and managing reports using SQL Reporting Services (SSRS) Strong knowledge in using database third party tools (SpotLite, RedGate, SQLDoctor, ERWin, SentryOne, SCOM and DataWatchDog) and Graphs as well. Performed Database migration/upgrades between multiple versions and implemented ARCHIVELOG process to maintain active log files Strong working experience with SQL Server Database High availability using Failover Clustering, Replication, Database Mirroring and Log shipping and specialty in Configure and Manage Failover Clustering and AlwaysOn High Availability. Experience in writing SQL/T-SQL Programming, implementing and apply the T-SQL code, stored procedures, Views, Trigger and Function. Hands on experience on DB Backup and Recovery strategies, Handling table space and file systems space issues, and extending Table space Hands on experience in Ticketing System. Working and troubleshooting on day-to-day problems via opening and closing tickets Working experience on Operating Systems (O/S) include Windows Server 2016, 2014, 2012R/ 2008R2 Experience also includes installing, configuring and administering the above operating systems. Administered user accounts AD (Active Directory) in Windows 2008/2012/2014 Server, Managed file and backup server. Working experience on

Windows and Cloud SQL Server Azure Experienced Cross Functional DBA with significant communication skills and technical expertise, focused and efficient working, effective team player with good communication skills

Work Experience

SQL Server Database Administrator eBay Inc - San Jose, CA April 2017 to Present

Responsibilities: Supporting SQL Server, Oracle, Mysql, Sybase ASE databases and We are supporting about 200 VMs and 20 Microsoft Azure and 10 Amazon Web Services (AWS) Server. Completed two projects for apply service packs to more than 200 Servers as a project manager. Completed one project for DR solution for 10 Servers and successfully completed the testing as a team member. Now working on a migration project for upgrading Database Installation, Configuration, Upgrading SQL Server and including cloud Azure environment. I have completed a project for 50 SQL Server Database Migration from Local to AWS environment. Install/upgrade/configure MSSQL and SQL Server Setup, Configured and Maintained MSSQL Always-On Availability Groups in SQL Database Backup and Restore Security management of MySQL, Oracle and COCHDB server Deploy Databases, Stored Procedures, Function, Triggers, Indexes by using RMR and work with dev and QC team. Perform On calls Duties and resolved the issues. Monitor and resolve the issues of SSRS and SSIS services Deploy the SSIS, SSDT packages to the QC and Production Servers and resolve the issues.

DATABASE PROGRAMMING: Writing T-SQL, Trigger, Function, Views and Stored-Procedures Assisted Database Developers to optimize SQL Queries and Stored Procedures Using PowerShell and SQLCMD commands

SQL Server DBA CTIS - Rockville, MD February 2016 to March 2017

Responsibilities: Setup, Configured and Maintained Fail-Over Clustering using SQL Server Setup, Configured and Maintained AlwaysOn_Availability 2012 Setup, Configured and Maintained Fail-Over Clustering On Windows Server and 2008 R2 Setup, Configured and Maintained AlwaysOn_Availability Windows Server 2012 R2 Setup SQL Server Azure Setup Replication, Mirroring and Log Shipping on SQL Server 2008 and 2008R.

Project 1

Database Monitoring/Performance Tuning: Strong on database Monitoring and Performance tuning of SQL Server and Windows Server Scheduled jobs to automate different database related activities including backup, monitoring database health and disk space, Jobs Setup and

Monitoring Project 2 Report Development: Installed, Configured, and administered SQL Server Reporting Services (SSRS) Developed Reports using SSRS Deployed Reports Project 3 Database Programming: Writing T-SQL, Trigger, Function, Views and Stored-Procedures Assisted Database Developers to optimize SQL Queries and Stored Procedures Using PowerShell and SQLCMD commands Database Administrator IDS - Alexandria, VA June 2014 to January 2016 Responsibilities: Installed and Configured SQL Server 2005, 2008R2 and 2012 Administer Windows Server 2003, 2008 and 2008 R2 Database Backup and Restore Apply Service Pack on Windows Server 2003, 2008 and 2008 R2 and SQL Server 2000, Database Migration Upgrade Windows server 2003 to 2008R2 Project1 Database High Availability: Installed, Configured and Maintained Fail-Over Clustering using SQL Server 2008 R2/2012 Installed, Configured and Maintained Database Mirroring of SQL Server 2005, 2008 R2 and 2012 Configured Log Shipping SQL Server 2005, 2008 and 2008 R2 Configured and Maintained Replication Project2 Database Monitoring/Performance Tuning: Strong on database Monitoring and Performance tuning Monitor SQL Server Logs, Agent Error Logs and Space usage Monitor Server Activity and solving problem as needed Project3 Database Programming: Writing T-SQL, Trigger, Function, Views and Stored-Procedures Assisted Database Developers to optimize SQL Queries and Stored Procedures Using PowerShell and SQLCMD commands Database Administrator Allscripts - Chicago, IL March 2012 to May 2014 Responsibilities: Installed, Configured, and Managed SQL Server 2000, 2005, 2008 and 2008R2 Database Backup and Restore Preproduction staging environments. Approximately 80 of the servers are dedicated MS SQL Server 2000 and Servers on a mixture of Windows 2000 and 2003. Monitored the system at RDBMS level as well as OS level, memory, processor, Disk I/O, user connections and locks Created user logins and adding users to the respective databases and managing the Security tasks like granting and revoking permissions. Performed Recovery of a Database by dropping the database and recreating the database Performed database maintenance activity by scheduling update statistics and reorg rebuild to reclaim space and improve performance. Writing T-SQL, Trigger, Function, Views and Stored-Procedures Assisted Database Developers to optimize SQL

Queries and Stored Procedures Using PowerShell and SQLCMD commands Database Administrator Practice Fusion - San Francisco, CA July 2011 to February 2012 Responsibilities: Bring both relational and non-relational chops to help us build and maintain our SaaS data stores both on-premises and in the cloud (AWS). Ensure the continuous availability of our mission critical systems. Help manage all aspects of our AWS instances and EBS storage backing our cloud platforms. RDBMS platforms. collaborate with the broader SaaS Ops, Data Architecture and Engineering/DevOps teams to deliver solutions Education Bachelor's Skills DATABASE (7 years), SQL SERVER (6 years), REPLICATION (2 years), SQL (6 years), T-SQL (6 years) Additional Information TECHNICAL SKILLS: Database Migration SQL Server 2016, 2014/2012/2008 R2. ETL/BIDS Tools SSIS and SSAS/DTS with using BIDS/Data Tools Reporting Services SSRS (SQL Server Reporting Services) with BIDS/Data Tools Operating System Windows Server 2016, 2012R2/2008R2, VMware, SCOM, SSCM Hardware/Storage RAID, SAN and NAS and Troubleshooting any Hardware and Software related Issues Performance Tuning Performance Tuning with native tool and third party tools also. DR/HA Solutions Configuration, Management, Troubleshooting, Administer Replication, Mirroring, Log Shipping, Clustering and Always-On-Availability Database Development T-SQL programming, Windows Powershell and SQLCMD
