

Web/Application Developer & Front- End Designer Web/Application Developer & Front-End Designer Greenville, SC I'm a dedicated and creative designer/ developer, and one of the most diverse and resourceful marketing specialists in the upstate. While being unique and talented on the coding of the field, I also possess the artistic side of the skill set as well. Being able to take a project from start to finish if required is a talent that is very rare to come by these days. I take pride in my work and love doing what I do. I'm confident in my skill set and enjoy the challenge of learning new technology, techniques and practices when required. The marketing and I.T field has gradually become a huge part of my life over the last ten years. I couldn't imagine myself working in any other field while being as driven, dedicated and eager to please on a daily basis as I am designing websites and applications. I have fun with every project and always aim to be the best that I can be and as consistent as possible.
