

Software Developer Software Developer Software Developer Swansea, MA Work Experience

Software Developer Maritime Planning Associates - Newport, RI October 2018 to May 2019 I worked to add features and correct bugs in a web based Java GWT application, using Eclipse IDE and Relational Team Concert (RTC) for source control. I worked on different portions of the application such as the UI and database related issues. This was primarily a remote position with two days in the office.

Software Developer KBRwyle - Burlington, MA June 2017 to September 2018 As a software developer for KBRwyle, I am responsible for the development of software Tests using the Cucumber and Citrus frameworks. I also review bugs and issues that are Discovered by these tests. I have also worked in our Jenkins CI environment to automate our performance tests that are based on SoapUI. I also worked with Docker containers as part of our testing infrastructure.

Programmer Analyst Medical Information Technology Inc - Westwood, MA December 2015 to June 2017 As a programmer analyst at Meditech I am primarily responsible over troubleshooting and resolving issues within our administrative applications. When a customer using our software finds an issue or an unexpected result from the software that could not be solved by first level assistance I am then requested to review and resolve the issue.

Software Support Technician Medical Information Technology Inc - Westwood, MA October 2012 to December 2015 While a software support technician I worked to update our customers software. I was responsible for deploying new Test environments. I delivered new application code to the customers' Test and Live systems. I also built a handful of internal utilities that helped to streamline my workflow including a dynamic email reminders for pending tasks and a status board for processes in progress.

Information Technology Intern Southern Virginia University - Buena Vista, VA May 2010 to July 2012 As an intern I had numerous responsibilities, including the installation of software and the deployment of new computers, hardware repairs and replacements on various computer systems, as well as virus detection and removal. I have also pulled cable for network devices. I have installed Windows Server in a test environment setting, along with the establishment of users, groups, file shares, active directory, DHCP server, and domain controllers.
