

Self Employed Self Employed Front End Web Developer Eugene, OR As a highly motivated individual I strive to succeed and exceed in all that I do through hard work and the continual expansion of my knowledge base. Known for my ability to understand and retain large amounts of written information; I excel in learning and am committed to sharing what I ve learned and experienced. Having focused on property management, affordable housing, and web development for the last fifteen years I have a wide base of experience in these fields. Involvement in everything from resident services and project management (resident screening, fair housing, landlord/tenant law, etc.) to site staff management and compliance management. These have given me the skills to become a natural leader and problem solver. Having learned computers and programming on my own I have a thorough command of advanced computer use, Microsoft Office software programs and in generating, entering and transmitting general data into various software programs, websites and state and federal government databases as well as creating such software. Authorized to work in the US for any employer Work Experience Self Employed Web Software Development - Eugene, OR May 2018 to Present Was/am doing web software development on individual contracts and experimenting with my own software applications.
