

Assistant Professor Assistant Professor Smyrna, GA Work Experience Assistant Professor Kennesaw State University - Kennesaw, GA 2017 to Present Systems and Industrial Engineering Department Developed and managed syllabus materials to create a student centered course. Coordinated courseware and curriculum for online and campus with academic department chair. Facilitated class instruction for both online and campus courses. Evaluated student performance for outcome attainment.

IET 4135: Project Management for Engineers A comprehensive study of project management concepts within the Technology and Engineer environment, including project definitions, systems, Agile methodologies, cycles, and the roles and responsibilities of project leaders and their associates. Topics will include the definition of tasks, time estimates, cost estimates, resource identification, task delegation, project monitoring and control methods, Contacts and Procurement and risk management. Applications will include industrial and production environments, product development, and research and development. Microsoft Project software will be used to organize, schedule, control, and provide feedback on projects.

ENGR 3250: Project Management for Engineers This course is a comprehensive study of project concepts, such as project definitions, systems and agile methodologies, project cycles, roles and responsibilities of leaders and members, and procedures used in industrial and production environments. Topics include such areas as scheduling, controlling projects, time-cost trade-off, resource allocation and project cost control.

IET3410: Principles of Team Dynamics Students will learn the skills and techniques to succeed as a team member in the workplace. Topics include leadership and communication skills, social influences, decision making and problem-solving techniques, and team development. The purpose of the course is to introduce the student to the concepts of teamwork. Students will be able to manage a team project through all stages of development. Special emphasis will be on conflict resolution and establishing team norms.
