

Oracle Database Administrator Oracle Database Administrator Oracle Database Administrator -  
DDC IT Service Bowie, MD 8 years of experience in the IT Industry, 4 years of experience as an  
Oracle Database Administrator Responsible for Administration, Installation, Upgrading,  
Configuration, Maintenance, and Troubleshooting of the Oracle Databases Complete range of  
Oracle DBA activities including day-to-day production database monitoring, Backup & Recovery  
Administering the Database users, Managing all types of database objects and responsible for data/  
database security and protection Use DBCA to create and DBUA to upgrade Oracle databases  
Hardware troubleshooting, Issue logs tracking and Patch management with excellent technical skills  
Work Experience Oracle Database Administrator DDC IT Service February 2018 to Present  
Support daily database monitoring and administration tasks and respond to Service Requests that  
are assigned to the DBA team within the client's IT Service Management (ITSM) platform Perform  
database tuning and performance monitoring utilizing AWR, Oracle Enterprise Manager 11g, SQL  
Developer and TOAD Ensuring that the database/information systems are configured in  
accordance with DISA Security Technical Implementation Guides (STIGs), applicable patches and  
other cybersecurity requirements Setup and maintain documentation to conform to DoD standards  
Manage and maintain currently supported Unix-based OS including Linux, HP-UX, and/or Solaris  
on physical and virtual operating environments Created database reorganization procedures,  
scripted database alerts, and monitored scripts Handled database server tuning, application  
tuning, maintaining documentation, capacity planning and database security Enhanced  
MS-Access databases by improving user interface, introducing multiple-user access, and increasing  
security and stability Assist in Oracle problem identification and solving, sometimes requiring  
off-shift support Identifying and resolving incidents and address to mention partners  
problems/concerns Involved in all phases of database development, from needs assessment to  
QA/QC, design, and support Provide technical support for SQL\*net, External Procedures, Oracle  
security as defined by the DISA database Security Technical Implementation Guide (STIG)  
Resolve problems that occur during program Oracle Database Administrator Robust, Inc - Upper  
Marlboro, MD May 2014 to September 2016 Coding of new tables, views and modifications as well

as PL/SQL Stored Procedures, Data Types, Triggers, Constraints and Constraints    Weekly cloning and refreshes of TEST Database with PROD data    Upgraded the Oracle 10g database to 11g version and also applied patch set and interim patches    Monitoring the Oracle Instances, Users, Tables, Table spaces, Memory structures, and Rollback segments, Redo logs, Archived Redo logs and Alerts.    Successfully implemented Backup & Recovery using RMAN, Hot and Cold backups    Manage RAC instances using both srvctl and crsctl commands.    Involved in Mass Agent Deployment using Oracle Enterprise Manager 12c    Perform logical backup using Data Pump Setup and configured Oracle 11g/12c Physical Standby database (Data Guard) to ensure high availability    Expertise in creating Oracle Tables, Table Partitions, Views, and Materialized Views    Upgrade 11.2.0.1 to 12.1.0.2 using DBUA    Attend weekly meeting to discuss issues, progress of different projects and successful implementation.    Create SQL script for to manage database space availability.    Created and managed user accounts, profiles and system policies.    Scheduling backups using the crontab utility    Experience in monitoring and managing of Oracle instances using Enterprise Manager Grid Control (OEM Grid)    Migrated data using the data pump export (expdp) and import (impdp)    Created non-default listeners for databases.    Monitor Oracle database using database console.    Provided Oracle database administrative support to various user groups (application developers, data managers etc.);    Control and monitor user access to the database using roles, and profiles 24 hr. on call rotation    Performed hands-on monitoring, troubleshooting and administration of Local Area Network (LAN) resulting in performance and minimum downtime in the organization.    Create and Maintain of Databases through DBCA    Knowledge in Database performance monitoring & tuning    Investigate potential problems and issues raised by business users    Create and Assign Roles, Privileges and Profiles to Users    Monitoring Alert logs for any errors, problems or processes running    Configuration and working with RMAN (Recovery Manager).    Knowledge in cloning using cold backup, hot backup and RMAN

Oracle Database Administrator Anola Consulting & Associates - Silver Spring, MD May 2011 to June 2014    Planning, installation, configuration, management and troubleshooting of oracle 10g and 11g databases on Linux and Windows OS    Performed database upgrade from 10g to 11g and

11g to 12c using DBUA      Manage Oracle 2 node RAC on Solaris 10 using srvctl and crsctl commands      Installation and Management of Oracle using Grid 11g and 12c and database control by installing the software and agent, this I used to manage multiple databases.      Installation and application of several oracle critical patches to various database versions looked for critical path for the OS and also had to check the location of my O-Patch.      Monitored, optimized and allocated physical data storage for database systems      Implemented the use of Oracle Recovery Manager (RMAN) to back up the databases.      Performed import and export as needed on each database. Performed various daily RMAN backups and recovery for numerous oracle 10g and 11g databases using physical back (RMAN) and logical backup (export, import and data pump).      24/7 production environment support      Troubleshoot and resolved various oracle problems such as connectivity problems, back up and performance issues      Provided Oracle network troubleshooting, technical and administrative duties      Resolved complex database issues.      Created and managed documentation on the configuration and support of the oracle databases.      Applied security features to 10g and 11g databases      Tuned the database and applications for faster and better performance also performed goal-oriented tuning as necessary Education B.s in Accounting in Accounting Wilmington University Skills Data migration, Database, Microsoft sql server, Microsoft sql server 2000, Sql server, Oracle Db, Sql Db, DBA
