

Front end developer Front end developer Front end developer - Apple Inc Sunnyvale, CA 7 years of professional experience in developing highly scalable modern web applications and interactive software products using HTML/HTML5, CSS/CSS3, JavaScript, jQuery, AJAX, JSON, Bootstrap, SASS, Node.js, ReactJS and Redux. Experience working on scalable environment in Agile/Scrum methodologies. Prepare Test Cases following TDD (test driven development). Involvement in all stages of Software development life cycle including Analysis, development, Implementation, testing and support. Ability to write well-documented, well-commented, clear and maintainable efficient code for web development. Well-versed in Object Oriented Programming (OOP) with JavaScript. Experience in developing web pages in Responsive Design using Bootstrap and CSS3 Media Queries to adapt to the changing environment. Extensive experience in developing web page quickly and effectively using jQuery and also in making web pages cross browser compatible. Expertise in analyzing the DOM Layout, JavaScript functions, Cascading Styles across cross-browser using Fire Bug, Developer Tool Bar. Experience of Working with CSS Preprocessor SASS. Used scaffolding tools like NPM, Webpack and Gulp. Have experience in using GIT and SVN for repositories and file management. Involved in User Acceptance Testing, Usability testing. Experience in creating test suites using Jasmine and Jest. Used Jira, Radar and Agile tools to task/issue tracking Provide subject matter expertise in areas including Scrum & Agile process implementation, process improvement, project management, scope definition, cost/benefit analyses, risk identification, project methodology and resource allocation Used Chrome developer toolbar for debugging JavaScript and fixing issues. Good written and oral communication skills and Interpersonal skills with a strong ability to excel through collaboration with team members Authorized to work in the US for any employer Work Experience Front end developer Apple Inc - Sunnyvale, CA February 2017 to Present Responsibilities: Build Web pages that are more user-interactive using HTML5/CSS3, JavaScript (ES6), Node.js, ReactJS and Redux. Used ReactJS to implement functions in various pages: form validation, grid list, search, auto complete, modals, sort, pagination, multi-selection. Used Webpack to minify and bundle the code along with gulp. Worked on Joi Validations both on client side and server side. Developing CSS Style for

web page using SASS Structure. Handling cross browser compatibility issues Implement Web Accessibility and SEO techniques Transformation and integration of API's Make RESTful API calls to communicate with backend Work on Node.js as server side implementation. Write Unit Test suites using Jest and Enzyme. Work with Product Owners, UX Designers build conceptual demos and POCs Work with QA team on daily basis in fixing the reported bugs/defects and checking cross platform compatibility. Maintain the code base by frequent updates to revision and subversion control using GIT Use Radar/Agile tool to track tasks assigned Follow Agile methodology and Test-Driven Development Environment: HTML5, CSS3, SASS, JavaScript, React.JS, Redux, Node.js, RESTful web services, Jest, Enzyme, GIT, NPM, Webpack, Radar Front end developer Silicon Valley Bank - San Francisco, CA March 2014 to December 2016

Responsibilities: Involved in building a high efficiency Dynamic Single and Multiple Pages Web Application using HTML, HTML5, JavaScript, ReactJS, Node.js, Bootstrap, and CSS3. Used ReactJS to create views to hook up models to the DOM and synchronize data with server as a Single Page Application (SPA). Develop enterprise applications using JS library React.js and Redux Involved in writing application level code to interact with APIs, RESTful Web Services Used Bootstrap-material design framework to develop a Responsive web application. Making validations, session maintaining using HTML5 validations and bootstrap session maintaining option.

Ran the standalone front- end application in Grunt Server task runner. Responsible for checking cross browser compatibility and hence worked on different browsers like safari, Internet explorer, Firefox and Google chrome. Unit testing of application at development phase to make sure of the functionality on different devices using Jasmine. Moving the code base to integration by maintaining resources in team site repository. Updated the website from time to time for special requirements. Actively participated and provided feedback in a constructive and insightful manner during weekly Iterative review meetings to track the progress for each iterative cycle and figure out the issues. Involved in Agile process, two-week Sprints, and daily stand-up to discuss the development of the application. Environment: HTML 4/5, CSS2/3, JavaScript, Bootstrap, Grunt, Jasmine, GIT, NPM, Jira Front end developer Morgan Stanley Smith Barney - IN January 2011 to

July 2013 Responsibilities: Responsible for development of Web pages using HTML, CSS, Ajax, JSON and jQuery. Performed Client-side validations using JavaScript, jQuery plug-in called jqValidator. Created forms to collect and validate data from the user in HTML and JavaScript. Involved in writing application level code to interact with APIs, Web Services using AJAX, JSON and XML. Wrote a combination of jQuery plugins, as well as completely custom JavaScript to build a bleeding-edge, AJAX-driven user interface. Designed the table less web applications using CSS and with the help of and tags as per W3C standards. Making JavaScript functionalities related to validations, session maintaining. Created reusable templates and style sheets based on UI standards and guidelines. Performed functional tasks using specifications and wireframes. Performed Unit testing to increase the performance of the application. Actively participated in day-to-day meeting, status meeting, strong reporting and effective communication with project manager. Education Master's in Science & Technology Northwest Missouri State University - Northwest, Missouri, US Skills JAVASCRIPT (7 years), HTML (7 years), Git (4 years), HTML5 (4 years), CSS (7 years), reactjs (3 years), redux (3 years), sass (2 years), UI, React, Front End, Front-End Additional Information TECHNICAL SKILLS: Web Technologies: HTML/HTML5, CSS/CSS3, JavaScript, AJAX Framework& Library: Bootstrap, ReactJS, Redux, Node JS, jQuery IDE & Tools: VSCode, Sublime Text 3, NetBeans IDE Debugging Tools: Chrome Developer Toolbar, Firebug, Safari Web Developer Version Control: GIT, SVN Operating System: Microsoft Windows, Mac
