

UI/UX Developer UI/UX Developer UI/UX Developer Los Angeles, CA Re: Enrique Martinez To  
Whom It May Concern,

I am pleased to write a letter of recommendation on behalf of Enrique Martinez, who for the past 3 years has performed consulting work at United Airlines. Enrique has been a lead UX/UI developer responsible for creating new interfaces for the next generation United Airlines Reservations web application. The goal of this multi-year project is to create a modern, efficient web application to replace the legacy airline desktop software supporting thousands of Contact Center Agents around the world. As a web developer and designer, Enrique had a critical role working directly with business users/product owners to create UI prototypes. The team uses a Continuous Integration design process to produce high fidelity prototypes, requiring constant changes and very short turnaround time. Enrique truly was the star on the team. It became commonplace for Enrique to rewrite CSS and JavaScript while still in the design review meetings. His ability to quickly deliver updates and changes to designs in this fast-paced environment made him the go-to person on the team. Enrique is very fluid in his code writing abilities and has excellent UI design skills. I would consider Enrique a senior level developer in web interface technologies using HTML, CSS, and JavaScript. He was responsible for full website development, deployment, debugging, and content management. Demonstrated skills using: HTML5/HTML, CSS3/CSS, Bootstrap, JavaScript, JQuery, ES6, Knockout.js, Angular JS 1.x, Angular2, Gulp.js, Node.js, JSON, Jasmine, Webpack, Fiddler, IE11/Chrome/Firefox compatibility, Electron Browser Container, TFS, GIT, Visual Studio 2017, Visual Studio Code, and Web Storm. If you would like additional information about Mr. Martinez, you can call me at (773) 803-5xxx Sincerely, Manager Information Technology United Airlines Authorized to work in the US for any employer Work Experience UI/UX Developer United Airlines - Chicago, IL March 2016 to August 2019 - Designed and implemented UX strategy for United Airlines' Compass call center application - Worked directly with product owners when designing and iterating over new prototype designs - Built and initiated ux prototyping model and style guide effort for an enterprise level product - Delivered high fidelity designs with production ready code html5, scss, js, bootstrap, adobe creative suite, angular.js & angular 2+, git/agile, gulp/webpack, node Freelance Web Developer Wheeler Multimedia - Chicago,
