

SQL Server Database Administrator SQL Server Database Administrator SQL Server Database Administrator - Breakthrough Technologies Institute Work Experience SQL Server Database Administrator Breakthrough Technologies Institute - Washington, DC January 2017 to Present

Installed and configured 12 production SQL Server instances by developing and testing setup checklist that helped the process to be implemented both in manual and automated fashion.

Designed a database backup strategy to backup system databases and user databases

Performed Disaster Recovery (DR) drills on semiannual basis to make sure that the SLAs with regards to RPO & RTO can be met. Created and managed security principals on MS SQL Server, enforcing the security guidelines that were put in place by IT Governance fulfilling the requirement by the security auditors. Matriculated users, maintained system security, and monitored user access to the database. Eliminated longstanding production server issues by systematically troubleshooting and resolving the problem. Created projects and maintained packages that deal with different tasks using SQL Server Integration Services (SSIS) Developed Crystal Reports used to generate daily, weekly, monthly and quarterly Reports using SQL Server Reporting Services (SSRS)

SQL Server Database Administrator QTC Engineering Consultancy PLC - Addis Ababa, ET January 2014 to December 2016 Addis Ababa, Ethiopia Migrated from SQL Server 2008 to SQL Server 2014 by creating a Migration checklist in close collaboration with the app team. Designed different database backup strategies that comply with the company's RPOs and RTOs for multiple databases together with backup retention policies. Developed and maintained stored procedures, triggers, views, functions indexes and other objects within SQL server. Maintained the security and stability of multiple SQL server instances by applying service packs and security patches. I have closely worked with system administrators in validating the health of multiple SQL server instances post Windows security patching on a monthly basis. Extensively used Profiler, Extended Events and DMVs to identify bottlenecks that caused stresses on system resources. Monitored SQL Agent jobs to make sure all jobs run successfully every night. Worked extensively on Client/Server tools like SQL Server Management studio and Query Analyzer to Administer SQL Server. Created SSIS Packages to load and extract data from sources like flat files, excel, OLEDB, XML, and Oracle

to SQL Server. Education B.Sc. Addis Ababa Institute of Technology - Addis Ababa, ET July 2013
Skills DATABASE (4 years), MS SQL SERVER (4 years), SECURITY (4 years), SQL (4 years), SQL
SERVER (4 years) Additional Information Skills ? Proficient in: SSMS, SSIS, SSRS, SQL Server
data tools (Visual Studio 2010), TSQL, C#, .NET ? Expert knowledge of Performance tuning,
Backup and Recovery, and database Security. ? Experience on Always on and disaster recovery
(DR) ? Adept with Microsoft office suite (Access, Excel, Word, outlook) Adobe Acrobat and
Photoshop. ? Experience on Redgate
