

Frontend Developer Frontend Developer Frontend Developer - Shift Markets New York, NY
Authorized to work in the US for any employer Work Experience Frontend Developer Shift Markets
September 2018 to Present Develops whitelabel cryptocurrency trading platform using React,
Redux and Sass for a global client base. ? Builds React, Redux internal reporting dashboard
utilized by client success and finance teams. ? Manages complex Rest and websocket API
connections with Redux-observable and RxJS middleware. ? Connects realtime and historical
cryptocurrency data endpoints to provide a cutting edge trading experience. ? Works within an
existing deployment landscape, using AWS Fargate, Cloudfront, S3, and Travis CI. Freelance Web
Developer CURSR January 2016 to February 2018 Designed and constructed websites for an array
of clients utilizing JavaScript, jQuery, CSS and Bootstrap. ? Constructed jQuery photo/video sliders,
AJAX contact forms, and interactive UIs with ScrollReveal.js. ? Integrated Google Analytics, custom
A/B tests and event triggers to capture site navigation data. ? Worked closely with design team on
UI mockups for rapid prototyping. Configuration Analyst Cerner Corporation February 2015 to
February 2018 Promoted from Support Analyst to Configuration Analyst for outstanding performance
metrics. ? Configured pharmacy application solutions serving hundreds of clients across the United
States. ? Analyzed large pharmaceutical data sets and provided accurate application builds. ?
Worked with clients to resolve data conflicts and ensure a smooth deployment process. Education
