Work Experience PHP Developer/Web Designer/Graphic Artist January 2006 to Present Freelance

- ? Upgraded the functionality and layout for a popular web-based news/advertising outlet.
- ? Built security and login system for a new school with OpenID, and branded, designed, created, and maintained the website.
- ? Maintained a custom built registration and back-office system with PHP and MySQL.
- ? Implemented a custom shopping cart application and an online ordering system.
- ? Automated presenting links to audio lectures stored on a third party site.
- ? Created custom vector images and hand-drawn logos and designs.

Java/Perl Full Stack Software Developer Administrative Office of the U.S. Courts - Washington, DC May 2001 to July 2015 Team leader in the design and development of CM/ECF, the web-based case management and e-filing application installed at over 200 federal courts.

- ? Led development of the application's first mobile interface using responsive design.
- ? Presented technical information in both formal and informal settings to developers, analysts, managers, court staff, judges, and for video presentations.
- ? Met with project managers, IT security personnel, analysts, and developers to determine the architecture and security of the new Web Service architecture for the NextGen version of CM/ECF, along with other key software decisions.
- ? Introduced and maintained a new CSS, AJAX, and JavaScript framework.
- ? Designed and implemented a new UI standard for the Bankruptcy CM/ECF application.
- ? Created a unique time-entry widget that solved long-standing usability issues, and later adapted it using the NextGen technology stack.
- ? Voluntarily mobilized developers to build a tool for organizing and searching the code base to improve estimates for upgrading existing components.
- ? Maintained internal documentation.
- ? Served as primary support for the Tomcat web server.
