

Front-End Architect Front-End Architect Senior Front-End Developer Boston, MA Internet person with a passion for pixel-perfect usability and universal accessibility. My background is in LAMP development and lately I've been enjoying the creative flexibility offered by modern front-end tools like Webpack, PostCSS, Babel and React. I love learning about new technology and enjoy few things more than reading and writing clean code.

**Work Experience**

**Front-End Architect MERGE Interactive** - Boston, MA March 2019 to Present Architecting and developing internationalized, scalable enterprise web apps using ES6, React, Redux, & Immutable.js.

**Senior Front-End Developer Connective DX** - Boston, MA January 2017 to March 2019 Building atomic front-end components for Sitecore-based corporate & marketing sites for national corporations, using ES6, React and PostCSS. Developing and maintaining (as a team) an in-house Webpack developer toolkit, Fuzzy Chainsaw. Working on an agile team with peer-reviews and structured version control & deployment processes.

**Front-End Web Developer Racepoint Global / Janeiro Digital** - Boston, MA February 2014 to January 2017 Prototyping and building scalable, API-driven interfaces for organizations with big data such as Amazon, Caterpillar and SevOne with modern front-end technologies including Angular, React & Webpack. Crafting WordPress-based marketing sites micro-sites for brands including IBM and ARM. We took home the 2015 MITX Best B2B Marketing Website award for the work we did with IBM on their Security Intelligence project.

**Full-Stack (LAMP) Web Developer AMP Agency** - Boston, MA November 2012 to February 2014 Building WordPress-based corporate & marketing sites for brands such as McGraw-Hill and Hasbro. Rapidly prototyping and creating one-off PhoneGap & web apps, micro-sites and other campaign experiences.

**SugarCRM Developer Levementum** - Boston, MA February 2012 to November 2012 Building custom CRM solutions with SugarCRM for corporations such as Otterbox, Fujitsu and TaylorMade. Working on a large, Agile team, utilizing strict Gitflow integration & deployment processes.

**Web Developer New Perspective Web Solutions** - Worcester, MA January 2009 to January 2012 Working as the sole in-house developer and responsible for every facet of the build and maintenance process. Building small websites for local businesses with PHP, using a homebrewed CMS, Joomla or WordPress.

**Education** Some college

**Skills** Front End, Javascript,

Angular, React, UI, HTML, HTML 5 (5 years), WordPress, Front-End, User Interface, Angularjs, jQuery, PostCSS, ES6, SASS, Webpack, Node, HTML5, CSS3 Links <https://brian.staruk.net> <https://resume.brian.staruk.net> <https://github.com/bstaruk> Certifications/Licenses Driver's License  
Additional Information I am a front-end web developer & UX architect who lives and works in Boston, MA. I have a passion for creating usable, scalable and accessible applications on the net with semantic HTML, CSS and JavaScript (ES6, React). My background is in LAMP development, having spent >5 years as a WordPress developer, but I've since traded in gulp tasks and jQuery for Webpack and Babel.
