

Systems Administrator Systems Administrator Systems Administrator - Industrial Electrical Company
Modesto, CA Authorized to work in the US for any employer Work Experience Systems
Administrator Industrial Electrical Company 2012 to Present Current long term projects:
Implementation and administration of Microsoft Dynamics In my current role I serve as the lead for
day-to-day operations. Under the supervision of the IT Director, I handle tasks such as leading
weekly IT meeting, serving as the escalation point for teammates (Systems Analyst and IT Support
Specialist), and making decisions for IT purchasing/consulting. Day-to-day: Manage Windows
2003/08/12 Server environments utilizing Active Directory, DHCP, VPN, IIS, Microsoft SQL Server
20xx, Microsoft Clustering Services (MSCS), and Storage Area Network (SAN) configurations
Manage purchasing and warranty contracts for IT hardware and consulting. As lead Sys Admin, I
handle all disaster recovery scenarios. From our server infrastructure to desktop level. Our current
backup solution for VM's is Dell vRanger and for our physical servers we use Macrium. Network
administration is also a big part of my job. We use Untangle to manage our network policy. It serves
as our Firewall/Web Filter/Spyware Blocker/Intrusion Prevention. We are in a Windows Domain
Environment, all company machines are joined to the domain. Using the Microsoft Deployment
toolkit we have streamlined the way we deploy machines. We can have a bare metal machine
production ready within an hour. Telephony: We run a hybrid solution on-site. Our PRI connects to
our Cisco 2800 box, which feeds the VoIP phones in the company. I am competent in Cisco CME,
and can do intermediate tasks. We have slowly been migrating to Microsoft Lync for its Unified
Communications ability, about 50% of the users onsite are running off of Microsoft Lync phones.
50% of the work to get this done was done in-house, the rest was outsourced. Deployed Microsoft
Exchange on-premise Filemaker database administration Hardware: HP Proliant Gen 7 & 8
servers HP MSA storage HP network switches Systems Analyst Industrial Electrical Company
2011 to 2012 Supporting over 100 workstations in 3 separate branches (Modesto, Fresno, Sac)
Purchasing agent for companywide IT needs Help Desk (Spiceworks) Admin for user access and
permissions (Active Directory) Database development (Filemaker) Backup and imaging for desktop
machines (Symantec BESR & Macrium Reflect) Education Associate's of Science in Computer

Science Modesto Junior College 2006 to 2008 Links <http://Linkedin.com/in/joelsalinas209>
