Work Experience Front- End Developer Bridge Global Education. Inc - San Ramon, CA November 2016 to August 2017 Project: Online Management/Teaching Description: Immigrate a static website into dynamic web application. Supporting multi-user login, admin authority and online teaching using React.js. I took responsibility to improve responsive design using Bootstrap, adding

functions based on client's request, working in agile method, having meeting with the team every week, working with back end team to deal with API problems. Responsibilities: Participated with end users and business analyst to understand the business requirements Responsible for design and development of the web pages from mock- ups (PSD). Designed dynamic and browser compatible pages using HTML5, CSS3, JavaScript and React.js. Implementing business logic and rules by writing code for classes and functional methods in JavaScript and React.js. CSS styles were developed in order to preserve the uniformity of all the screens throughout the application and positioning of screen objects. Used Object Oriented Programming concepts to develop UI components that could be reused across the Web Application. Worked closely with back end team to implement AJAX call to REST APIs and update dynamic functionality of HTML in React.js. Created web pages using Media Queries and Twitter Bootstrap that cater to Android and IOS web platforms. Developed multiple POCs to create a user transaction grid in React.js. Writing unit test with Jasmine to ensure robust code quality. Managed the frameworks and libraries with Webpack. Used GIT to do the coding record and version control. Encrypted code using SSH's public key and private key. In Agile, I was response for a whole component development, include client requirement, layout design and function reality. Participated in AGILE SCRUM meetings, sprint planning sessions and retrospective meetings during the 2 week sprint cycles. Environment: HTML, CSS3, JavaScript, React.js, Bootstrap, AJAX, JSON/XML, Git Front- End Developer Blue Cross Blue Shield December 2015 to October 2016 Project: Sales Details Taking responsibility to build a sales project which mainly uses for business clients. Usually, the sales representatives have the details about the product. With the help of this application, business partners can also research about the product and get the sales quotes. I collaborated with Ux team. Responsibilities: Involved in developing web pages using HTML5. Developed UI using HTML5, CSS3, JavaScript validations and XML. Working with team developers to integrate HTML5 and CSS3. Improve UI and responsive design using company's internal CSS library. Involved in checking the browser compatibility issues and troubleshooting the issues. Responsible for developing CSS3 classes to GUI web page forms and controls. Developed and designed internet web applications using

JavaScript, CSS3 and JQuery. Create dynamic picture gallery using JQuery. Involved in checking the browser compatibility issues and troubleshooting the issues. Created a user-friendly call center application based on the client requirement and the consumer basis. Involved in developing web pages with the applications like login, username, password using HTML5, CSS3, JavaScript, JQuery and Ajax according to the client requirement for online login. Strong communication, analytical and interpersonal skills working within cross-functional teams.

Environment: HTML5, CSS3, JavaScript, JQuery, Adobe Photoshop, Git UI Web Developer Hua Xia Bank - Beijing, CN October 2013 to April 2015 Project: Money Tracker Immigrate an application to React.js which helps users to keep the track of their credit card statements and details. This application helps them to get the latest record of the bills and credit score. Responsibilities: Redesigning and developing the web pages using HTML, CSS, JavaScript and React.js Developing non-functional HTML, CSS pages from the mock ups and involved in UI review with Business Units. Filled mock-ups up functions with JavaScript and React.js. Good Understanding of Content Management System. Usage of adobe Photoshop for retrieval of images. Mainly focusing on cross-browser compatibility and fixed the bugs for several browsers with JavaScript and React.js. Worked closely with back end team to implement AJAX call to REST APIs and update dynamic functionality of HTML in React.js. Working with developer in UI Integration and defect fixing. Converted the mock-ups into hand-written HTML, CSS3, JavaScript and React.js.

Involved in UI Testing which is generally testing the graphical user interfaces, how user interacts with the application, testing application elements like fonts, layouts, buttons, images, colors etc.

Cooperate with QA team writing unit test with Jasmine to ensure robust code quality. Environment: HTML, CSS3, JavaScript, React.js, AJAX, JSON/XML, Git Skills AJAX (3 years), GIT (3 years), HTML5 (5 years), JavaScript (5 years), JSON (2 years) Additional Information TECHNICAL SKILLS:

Languages HTML5, CSS2/3, JavaScript, Java Web Servers AWS, Tomcat Framework React.js, AngularJS, JQuery, Bootstrap, AJAX IDE WebStorm, Eclipse, Ruby Mine, Methodologies: Agile, Waterfall Model Database Microsoft Access, My SQL Version Control Git, GitHub, GitLab Data Format JSON
