Projects: persule.com (not published now, unfinished start-up) - social network eventfiles.com (not published now, unfinished start-up) - event management system. IRS plus - backend administration of e-learning system. Minor tasks on other projects (not all of them were based on Drupal 7): meditrend.sk, i-med.sk and other, smaller websites.

Web Developer Self employeeed 2010 to 2012 Drupal 6 and Drupal 7 developer. I was working on smaller websites as backend and also frontend developer. Used technologies - Drupal 6 or Drupal 7 web-administration, CSS, Javascript, occasionally PHP development. Some of developed websites: www.eclat.sk www.salon-lucia.sk www.sophia.sk www.sbdb.sk www.profilbb.sk www.pyrotechnici.sk www.eclat.sk www.bruckner.sk www.jk-uctovnictvo.sk (I was working on more websites during this time period. Some of them does not exist anymore).

Worker in Warehouse SQP International s.r.o. - Vlkanov November 2006 to October 2008 Manual preparation of raw material used on PCB (printed circuit board) production.

Education Master's in Computer Science Matej Bel University - Bansk Bystrica September 2009 to August 2015 High school or equivalent in general education Andrej Sl dkovi?'s High School - Bansk Bystrica September 1994 to

June 1998 Skills Drupal (10+ years), PHP, Javascript Additional Information The topic of my graduation thesis on Matej Bel University is Implementation of slovak payment gateways into Drupal CMS system. It can be downloaded from official website of graduation theses register on following URL:

<https://opac.crzp.sk/?fn=detailBiblioForm&sid=0EA7DBD32D42EAF6EDE9495D4843&seo=CRZP-detail-kniha> Abstract of graduation thesis- The main goal of this work is to design implementation of slovak payment gateways into CMS system Drupal. As an application part of the work we will develop new Drupal modules using PHP programming language. We will integrate some of slovak payment gateways in these modules. The work also includes analysis of source code of Drupal e-commerce solutions. Detailed description and analysis of developed source code is also included in main part of the work. Reader is informed about basic elements of Drupal, like entities, hooks or other callbacks in theoretical part of the text. Drupal interfaces, like Form API or Commerce Payment API are also introduced to reader of this work. I have published source code attached to my graduation thesis as Drupal 7 sandbox projects: <https://www.drupal.org/project/user/668042> I use to discuss Drupal issues on Drupal forums :) Drupal.org website: <https://www.drupal.org/user/668042/track> Drupal answers website: <https://drupal.stackexchange.com/users/18120/tomas-teicher?tab=reputation> Last year (from July 2018 until now) I have mostly worked on my own custom projects (startups). I am developing these my projects in Drupal 7, too. These projects are not finished yet. In my free-time, I like biking in my bicycle in surrounding nature or playing chess. I also try to be an activist regarding IT projects managed by my city's local government.
