Provided technical support for PO account generator and FA account generator modifications 4. Los Alamos National Laboratory (Procurement and Financial Applications Specialist) 1. Implemented Oracle Sourcing 2. Implemented Oracle Procurement Contracts 3. Provided post-production support for Oracle Sourcing, Oracle Procurement Contracts and Oracle iProcurement 4. Created and lead training courses for Buyers using the new Sourcing and Contracts modules 5. Created and lead training courses for Requesters using iProcurement 6. Assisted with Oracle Framework customizations in the iProcurement and Sourcing modules 7. Created personalization's to meet business needs in iProcurement and Sourcing modules

5. Powell Industries (Financial and Procurement Applications Specialist, GL, AP, FA, CE, AR, PO, INV) 1. Provided production support for existing financial applications 2. Team lead for financial implementation (GL, AP, FA, CE, AR) 3. Assisted in providing training for key users in financial applications 4. Provided test scripts for new financial application module implementation 5. Demonstrated financial application functionality in conference room pilot exercises 6. Created XML Publisher reports from existing Reports 6i reports 7. Worked with manufacturing group to provide inventory expertise to streamline the job planning process

6. ThermoFisher Scientific (Financial and Procurement Applications Specialist, GL, AP, FA, CE, AR, PO, INV) 1. Provided production support for existing financial applications 2. Team lead for financial implementation (GL, AP, FA, CE, AR) 3. Assisted in providing training for key users in financial applications 4. Provided test scripts for new financial application module implementation 5. Demonstrated financial application functionality in conference room pilot exercises 6. Created XML Publisher reports from scratch and from existing

Reports 6i reports 7. Developed form customizations using forms 6i for Oracle Financial applications 8. Developed custom forms in forms 10G for custom application 9. Set up demonstration of Virtual Private Database capabilities to restrict access to customer data using access policies (this never went live) 7. Dell Computers (Application Development) 1. Developed GL and AP external interfaces (inbound and outbound) for 11.5.10 2. Assisted with verification and testing of external interfaces (multi-org, MRC) 3. Assisted with implementation of custom imaging system 4. Developed form customizations in forms 10G. 8. Los Alamos National Laboratories (DBA, Financial Applications Specialist) 1. Supported production and integrated test environments ? Apply patches ? Techstack Upgrade to 10G ? Moved production and test databases to RAC ? Upgrade Oracle Financial Application suite 11.5.8 to 11.5.9 ? Perform application system administration functions 2. Developed custom workflows for specialized Human Resources functions 3. Set up access policies to restrict access to selected critical data sets (virtual private database) 4. Assisted with effort to transition Oracle Financials data to a new operating unit in a multi-org environment 5. Developed custom extensions for Accounts Payable, Accounts Receivable, Purchasing, and Cash Management Lawrence Livermore National Laboratory (Application Developer) 1. Provided technical support for Accounts Payable, Accounts Receivable, General Ledger, Purchasing, Project Costing , and Project Management (version 11.5.10) Los Alamos National Laboratories (Financial Applications Specialist, Oracle Developer, and DBA) 1. Implemented Accounts Payable in Oracle Financials version 11.5.9 2. Provided technical support for Accounts Payable, Accounts Receivable, General Ledger, Purchasing, Project Billing , and Project Resource Management 3. Built custom forms for budget entry into Oracle Project Billing module using Forms 6i 4. Built custom mapping forms using Forms 6i for generic data mapping 5. Implemented the Integra Apps portion of Applimation to track application changes between instances 6. Supported several development and sandbox instances for financial applications ? Applied patches ? Monitored space ? Performed application system administrator functions Agilent Technologies (DBA) 1. Installed Oracle Financials version 11.5.5 2. Upgraded Oracle Financials 11.5.5 to 11.5.7 3. Implemented backup and recovery strategy 4. Provided support for

18 instances of Oracle Financials version 11.5.7 5. Patched several financial modules to version 11.5.8

Automotive Finance Corporation (Oracle Developer)

1. Developed new functionality for a custom Accounts Receivable system and interfaces into Oracle's AP and GL
2. Maintained current interfaces between a custom AR system and Oracle's AP and GL
3. Provided functional support for General Ledger and Accounts Payable

Austin Regional Clinic (DBA and Financial Applications Specialist)

1. Provide technical and functional support for financial applications
2. Develop new functionality for medical visit datawarehouse application
3. Develop interfaces between new practice management system and General Ledger
4. Develop a custom application to capture required data the practice management system does not accommodate

Automotive Finance Corporation (Oracle Developer)

1. Developed new interfaces between a custom AR system and Oracle's AP and GL
2. Maintained current interfaces between a custom AR system and Oracle's AP and GL
3. Developed interface between a custom AR system and Oracle 11i modules (GL and AP)
4. Provided functional support for General Ledger and Accounts Payable
5. Provided functional and technical support for Cash Management
6. Assisted in developing and maintaining interfaces between Cash Management and a custom AR system.
7. Researched and implemented a multi-org configuration

Austin Regional Clinic (DBA and Financial Applications Specialist)

1. Upgraded Financials from 11.0.3 to 11.5.4 (11i)
2. Upgraded database from 8.0.6 to 8.1.7
3. Provided functional and technical support for General Ledger, Purchasing, Accounts Payable, Order Management, Fixed Assets, and Inventory

ACCO International, Inc. (DBA)

1. Assisted with installation, tuning, and monitoring of Oracle 8.1.6 and 8.1.7 databases
