

Teradata Database Administrator Teradata Database Administrator Database Administrator
Chicago, IL Work Experience Teradata Database Administrator Ford Motor Company - Dearborn, MI
October 2012 to Present Responsibilities Teradata Database Administrator Worked extensively in
Data Warehousing as a Teradata DBA well versed in Performance Tuning, Capacity Planning,
Workload Management, Solving the Design and performance issues in the system. Conduct regular
proactive security audits to address any security issues that may occur and necessary action to
protect the integrity of data and systems. Proactively reviewed Teradata technical alerts and identify
any impacts applications/systems/data and make the necessary recommendations or actions to
mitigate these impacts. Created/participated on creation of data model for the mentioned modules.

Develop archival, backup and recovery strategy. Performance-tuned written SQL and PL/SQL
code. Support the application development teams for database needs and guidance Helped
fixing data migration errors from the legacy systems. Wrote SQL for Oracle and Teradata, scripts
for Teradata loading utilities and Linux/UNIX shell scripts. Designed and created database
hierarchy, initially sized the databases and managed their sizes afterwards, created and modified
according to developers needs all database objects, set up users, roles, profiles and general
security rules based on customer s internal standards, designed and maintained table compression
and statistics collection, carried out various maintenance tasks (packdisk, showfsp, scandisk,
checktable, etc.), backed up and restored databases according to project s needs, monitored
operations of Teradata systems, etc. Handling the Change Management and incident
management for the production issues. Implement/Revise indexes (Implement Primary and
Secondary indexes and set up Statistics collection process) Managing the live code movement in
ENDEVOR system. Was involved in Implementing TDWM (earlier Priority scheduler was used)
Performing the data warehousing space, capacity planning & analyzing the CPU and IO
requirements 24x7 on-call support rotation Database Administrator British American Tobacco May
2009 to February 2012 Manage Oracle database administration assignments for diverse industry
clients. Enhance database performance, perform restores, implement recovery procedures, handle
performance tuning and conduct regular system backups. Ensure technical and functional designs

meet business requirements. Responsibilities Installation of Oracle 11g on Linux and creating new databases. Developing PL/SQL programs for data manipulation. Installation of Oracle client tools and establishing connectivity to databases Creating table spaces, tables, indexes, users, etc. Providing assistance in physical data modeling. Managing security. Sizing database objects for effective space management and optimal performance Trained a new DBA in our environment.

Oracle Database Administrator ABN AMRO Bank December 2007 to May 2009 Responsibilities

The work was to maintain, refresh and load a number of very large Databases for customers throughout Pakistan. This involved database creation and monitoring. The team provided support to users who accessed the databases by Business Objects. This involved advising in the setting up of Business Objects Universes. Database optimization and performance tuning was a large part of the work. Education BS in Software Engineering Foundation University of Management and Computer Sciences Additional Information Specialties Teradata Utilities: BTEQ, Fastload, Multiload, Fast Export, T pump Oracle 10g Installation and Troubleshooting at (Windows, Solaris, AIX, RedHat 4 AS) platform Oracle Backup through RMAN, Data pumps Oracle DBA task, Application server, RAC, Data Guard Ability to analysis MIS System. All General task on Linux system Oracle Financial R12 Install Patch, Cloning, AD utilities and Multi-Node Installation on Oracle Linux, Red Hat, Sun Solaris and IBM UNIX Skills and expertise Oracle 11g Database Administration SQL Tuning in an Oracle environment Standby/Failover Administration Performance Tuning & Capacity Monitoring Data Security, Backup & Recovery Oracle RAC & ASM Administration/Installation Oracle forms and report development
