

AWS Administrator AWS Administrator AWS Administrator - Sulzer-US LLC West Haverstraw, NY
AWS Solution Architecture, DevOps, Networking, and Security Work Experience AWS Administrator
Sulzer-US LLC - Montvale, NJ February 2019 to Present * Set up AWS architecture following AWS
best practices with VPC networking, Route 53 hosted zones, sub domains and AWS Certificates.
Using Route 53 to create Alias for our Elastic Bean Stalk applications using elastic load balancers. *
Managed set up of Elastic Search, Redis and Dynamo DB databases through AWS CLI and Cloud
Formation to help create databases for the developers that asked for solutions to caching and
storing data. * Used Cloud Front distribution to help cache our application data as well as using
CloudFront as a proxy for our spring boot applications. * Help train developers in Germany with
understanding networking such as public and private subnets, route tables and Internet gateway
connections. Set up for Elastic Search database for Audi to be secure and not be reachable from
the outside, used VPC peering with the proper routing and security groups to reach Elastic search in
the private VPC by a bastion host on the public VPC. * In charge of auditing our AWS Accounts
following AWS best practices looking for security vulnerabilities, discussing what servers are running
and if they can be shut down if not needed, IAM users keys are rotated properly, removing
credentials of users no longer with the company, checking permissions of groups and roles for our
AWS services. Network Administrator Dominican College - Orangeburg, NY January 2016 to
January 2019 * Help lead a proof of concept project for the college using services such as EC2, S3,
VPC to host our servers on AWS while creating estimates for our migration and educating the IT
team on how AWS is managed, AWS best practices and how AWS would work with our Windows
bare metal servers environment * Created Amazon Alexa skills at Dominican College to keep track
of my tickets of the day using AWS Lambda to host my Python Code and C# code * Sets up and
maintains the Windows Servers 2016 Active Directory, keeping all containers updated and adding
new employees to their proper groups while using Power Shell scripts to automate adding the new
computers onto the network. * Responsible for managing the Network, Servers and PC across the
college campus while completing assigned tickets of users and maintaining Virtual Labs, Data
Closets Organization while helping to introduce AWS on to the campus. * Maintain on HP Aruba

Layer 3 switches managing the switches, updating, and troubleshooting our College VLANs. Help Desk Support LV Capacity Coverage Company - Mahwah, NJ September 2014 to September 2015

- * Help Desk support role, helping to manage 300+ employees in both NY, NJ, TN, FL and Las Vegas and remote where I helped manage the company ticketing system prioritizing customer support and maintain the company's PC and Servers.
- * Worked with Juniper VPN to configure VPN accounts for all users for the company, along with Barracuda Firewalls managing what sites were to be whitelisted for our clients and keeping track of any security threats.
- * Responsible for maintaining the Active Directory and Exchange Email accounts for users on base and remote.
- * Responsible for managing our Hyper-V Environment and creating Window Accounts for remote users and maintain the PC in the data room.

Education Bachelors in Management Information Systems in Management Information Systems Dominican College - Orangeburg, NY December 2014 Skills ACTIVE DIRECTORY, DNS, EXCHANGE, DHCP, JUNIPER, VPN, EC2, DATABASE, AMAZON WEB SERVICES, C#, FRONT-END, NODE.JS, JSON, memcache, PYTHON, DYNAMODB, REDIS, LINUX, AWS, Docker, Devops, Powershell Links <https://github.com/dan2melz/MyProjectTemplates/tree/master>

<https://www.linkedin.com/in/daniel-melendez-7a775ba1/> Certifications/Licenses AWS Solution Architect Professional June 2018 to June 2021 The AWS Certified Solutions Architect Professional exam validates advanced technical skills and experience in designing distributed applications and systems on the AWS platform.
