

Database Administrator Database Administrator Database Administrator - Taconic Innovations *

Over 6 years total IT experience in SQL Server, other RDBMS, and Windows Systems Administration, Design & Development, Systems Architecture and Infrastructure. *

Installed, upgraded, and administered SQL Servers 2014/2008 R2/2005/2000 in virtual and physical servers in development, Test, and Production environment. *

Expert in configuring cluster environments: SQL Server 2008 R2/2008/2005 Active/Active and Active/Passive cluster on Windows Server platforms. (Windows 2012, Win2k8R2, Win2k3). *

Experienced in performance Monitoring and Tuning, Query Optimization via T-SQL, DMVs, System Monitor (Perfmon), DBCC Utilities, Database Tuning Advisor/Index Tuning Wizard, and SQL Profiler. *

Experience with database backup, restore, and disaster recovery procedures *

Developed and documented database migration strategies, ETL using SQL SSIS/DTS, Import/Export and BCP utilities *

Supports RDBMS databases in a High Availability environment(Always On, Clustering, Replication, Database mirroring etc.). *

Results-driven DBA with skills in team building and problem-solving with an established reputation for effectively working with diverse groups of people and adaptability to changing environments and new software version releases. *

Experience as On-Call 24x7 production DBA support, system administrator; handle business service requests using Helpdesk Request Management. *

Experience in full life cycle projects from analysis phase to production support. Work Experience Database Administrator Taconic Innovations July 2017 to Present

Installed, upgraded, and administered SQL Servers 2014/2008 R2/2005/2000 in virtual and physical servers in development, Test, and Production environment. *

Upgrade SQL Server database environment from SQL Server 2000 -> 2005-> 2008->2012>2014 *

Interface directly with end user's and other IT groups to ensure complete resolution of server issues reported through the Help Desk tracking system. *

SQL Server jobs performance and impact on normal operations. *

Monitor and provide response for all database systems. *

Provides support in planned DR solution testing between multiple Data Centers Database Administrator Info source Data Solutions - Highland, MD October 2014 to Present

Plan, install, build, manage, support, configure and test Database server infrastructure components and connectivity. *

Deploy new SQL Server environments in Production,

QA and UAT environments. * Maintain server security in compliance with Department of Defense (DoD) and supporting vendor requirements. * Installed and configured 4 node SQL Server 2014 Ent cluster between 2 data centers with Always-On Availability Groups configured for replication between data centers. * Manages multiple nodes of Clustered and Stand-alone SQL server 2014/2012/2008 R2 * Monitor and troubleshoot backups, scheduled jobs, and monitor systems and processes for performance related issues. * Provides support in planned DR solution testing between multiple Data Centers * Interface directly with end user's and other IT groups to ensure complete resolution of server issues reported through the Help Desk tracking system. * Perform vulnerability and remediation for all SQL Server database server hosted across multiple data centers. * Participates in meetings impacting databases physical architectural design. * Apply Microsoft Security Patches. * Perform threat modeling, static application security testing, code reviews, and secure design reviews for high risk applications * Participates in Scrum teams in support of Agile projects; end-to-end support for build, deployment, and operational activities.

Database Administrator Ishglo - One Corp - Frederick, MD June 2013 to October 2015 Remote * Implemented efficient Disaster Recovery Strategies and High availability include Always On Availability Groups, Replication (Snapshot, Transactional and merge). * Installing and configuring MS SQL Server 2005\2008R2 failover Cluster and its applicable Service Packs. * Setup, configure, administer and maintained SQL Server databases (Prod, Stage, Test and Dev Environment) for various groups such as Developers, QA and DA users and ensured database availability in a 24X7 environment. * Implement and manage MS SQL Cluster (Active/Passive & Active/Active), Multi Node Cluster up to 8 Node * Upgrade SQL Server database environment from SQL Server 2000 -> 2005-> 2008->2012>2014 * Scheduling and managing SQL Server database backup jobs. * SQL Server jobs performance and impact on normal operations. * Developing and implementing DBA maintenance plan * Participated in meetings impacting databases physical architectural design. * Assist web Application developers with database related issues * Maintain Relational Database infrastructure, software, upgrades, and patches. * Monitor and provide response for all database systems. Hardware/Software: SQL Server 2000/2005/2008/2012, 2014/2016, , SQL Windows

2012/2008R2/ 2003/ XP/NT, and MS office. Education BA in (Psychology), Information Studies

University of Ghana 2007 to 2011 Skills MYSQL
