

RPA Developer RPA Developer RPA Developer Frisco, TX Over all 6+ years of experience in Information Technology. 1.5+ years of Experience in Robotic Process Automation (RPA) using the tool UiPath. Certified in UiPath RPA Developer Foundation Training, Orchestrator Training and SAP Automation Training. Microsoft Certified, Developing and Implementing Web Applications with Microsoft Visual C# .NET and Microsoft Visual Studio .NET Microsoft Certified, Designing and Optimizing Data Access by Using Microsoft SQL Server 2005 Hands-on Experience in UiPath Studio, Orchestrator, Different Recording Techniques, Screen, Data, Web Scraping Techniques, Debugging Techniques and Exception Handling. Worked with Web Data Extraction Technique to extract Structured, Tabled and Patterned based Data. Experience in implementing various UiPath Activities, Selectors, and Data Tables etc. Worked on Image, Text, Email, Excel and PDF Automations. Good Understanding on usage of various UiPath Orchestrator functionalities like Bots, Processes, Assets, Jobs, Schedulers and Logging Methods. Experience in different phases of Software Development Life Cycle (SDLC) Methodologies like Design, Development and Testing.

Knowledge of Software Development Models: Waterfall and Agile\Scrum Methodologies.

Knowledge of SQL Server, SQL, UNIX and Adobe Photoshop. Knowledge of Robotic Process Automation (RPA) using the tool Pega Robotics (Formally Known as OpenSpan). Knowledge in using Pega Robotics Windows and Web Adapters during the development of Bots in OpenSpan.

Knowledge in developing bots to communicate between a windows application and a web application to retrieve customer information in OpenSpan. Knowledge in Pega Robotics Debugging Procedures and Exception Handling Techniques. Proficiently used Microsoft DotNet Technologies and implemented Object Oriented Programming Concepts (OOP) to develop applications. Experience in developing stored procedures for data transactions with the Databases, in the Applications. Experience in performing different kinds of testing like Functional, GUI, Integration, Backend, Regression and System Testing. Automated numerous routine tasks using UiPath, thereby reducing manual intervention. Enthusiastic in learning new concepts and apply them effectively when needed. Strong interpersonal skills, analytical and problem solving skills with the ability to work individually as well as a team player. Good verbal and written

communication skills. Ability to work in Multi-Platform Environments. Authorized to work in the US for any employer

Work Experience

RPA Developer Liberty Bank, CT July 2018 to May 2019

Responsibilities: Worked with Business Analysts to create PDD (Process Definition Document)

Produced Automations, using both Automatic (Basic, Desktop, Web) and Manual Recording techniques(Hot Keys, Keyboard simulations). Extracted the data to process, using various UiPath Screen Scraping techniques like full text, Native in the Automations. Created DataTables to store the extracted data and then saved to .csv files. Used String Operations to carry out string search, comparisons for sending emails etc. Well versed with the UI Elements. Able to login into a Web portal and extracted Structured data using Data Scraping Technique and saved it into Excel Worksheets. Deployed the published packages in the Orchestrator and scheduled bots to execute the jobs. Performed Email Automation by utilizing Send Email Activities to email reports and errors. Edited and optimized the Selectors for optimal execution of workflows. Handled Data in the processes using Data Tables, .CSV files, Excel Commands etc. Implemented the Image Recognition and Text Recognition activities to automate processes. Implemented Exception handling throughout the project for error handling. Monitored and logged all the Exceptions encountered during the development of workflows. Closely worked with the Production team to resolve any production issues. Thoroughly followed naming conventions, to name the flowcharts and the actions in workflows. Good Analytical Ability to troubleshoot bots and provide required solution.

Environment: UiPath, ASP.NET, SQL Server, JavaScript, HTML, CSS, Windows Office, Angular JS.

RPA Developer MassMutual Financial Group, MA October 2017 to June 2018

Responsibilities: Worked on design, development, testing and deployment of bots using UiPath. Responsible for analyzing and identifying the suitable business processes for automation. Worked closely with the business team to create PDD. Extensively used different Recordings techniques like Basic, Web etc. and Screen, Web Scraping techniques in the project. Used Input Methods like Default, Simulate Type/Click for inserting and logging data actions into the web browsers while implementing the Web Recorder. Implemented image activities for proper website or application loading and then to carry out certain actions in the logic. Extensively implemented Exception

Handling using the Try/Catch Activity throughout the project. Implemented various control flow activities like, for each activity, if activity, assign activity in different workflows. Utilized the Email Automation to send automated emails in case of any issues and reports. Worked on the Excel and CSV Activities in the workflows for Data Processing. Automated text in PDF files using screen scraping to calculate the invoices and store them into a CSV file. Image based and Text automation were used, for interacting with the application. Used Orchestrator to manage Schedules and Robots to carry out assigned automations. Effectively troubleshoot any issues in the automations using debugging procedures like breakpoints, slow step etc. Provided support to any production related issues. Environment: UiPath, C# .NET, SQL Server, XML, HTML, Java Script, CSS Software Application Developer Travelers, CT May 2016 to September 2017

Responsibilities: Designed the web forms using ASP.NET server controls, CSS style sheets and Validation Controls Used ADO.Net classes to communicate with the SQL database for the parts information. Implemented Data Grid Control to display the data in the web forms. Developed stored procedures for updating and maintaining the database with the parts information. Used query strings and session variables to maintain the data between the web forms. Implemented Exception Handling to ensure efficient application execution. Performed validations using validation controls like Required Field Validator, Compare Validator etc. Performed unit testing in development environment. Updated the Status in the daily Scrum meetings. Environment: Microsoft .Net Framework, C#.NET, Microsoft Visual Studio, ADO.NET, SQL Server, CSS, XML and HTML Software Application Developer Insurity Inc March 2015 to April 2016

Responsibilities: Responsible for developing and maintenance of Training Module. Developed the UI using Web Server Controls, Validation Controls and ASP.NET web forms. Involved in the UI customization of the Training module by developing CSS classes. Performed validations using ASP.NET validation controls. Loaded the data into the data grid control using ADO.NET, to display on the web forms. Executed Stored Procedures on the SQL Server, to edit or select any course information or course schedules. Used link buttons in the data grid control to select any course and view further details about the course. Involved in QA cycle, fixing any issues. Used CSS to create Fonts, Textboxes,

Grid and other things at the front end. Environment: Microsoft Visual Studio, C#.Net, ADO.NET, HTML, CSS, SQL Server, IIS QA Tester Visual Technologies Inc January 2013 to February 2015

Responsibilities: Participated in business requirements, test cases review, user requests and bug scrubs meetings. Analyzed Business Requirements (BR) and Application design documents and created Traceability Matrix interlinking the test requirements and test cases. Analyzed User requirements attended Change Request meetings to document changes and implemented procedures to test changes Created test plans and test cases for functional testing, unit testing, system testing, environment testing and user-acceptance testing, ad hoc testing, alpha testing Created SQL queries for the backend testing. Extensively used Quality Center for Test planning, Bug tracking, and Reporting. Attended daily scrum meeting to discuss the progress of the project and involved in defect migration and retesting in QA environments. Environment: Windows Server 2003/XP, NIX, UPHP, Perl, J2EE, IE6.0, Mozilla Firefox 2.0, Safari, Load Runner 2.0, Apache web server and Python. Education Bachelor's in Electronics and Communication Engineering EEC - TAMIL NADU, IN Skills UiPath, Orchestrator, Ms access, OpenSpan, Sql server, Oracle, Sql, .net, Visual studio, C#, Html, Javascript, Xml, Css, Asp.net, Unix, Windows 10, Windows 7, Linux

Certifications/Licenses UiPath Foundation Training Present UiPath Orchestrator Training Present UiPath RPA Developer SAP Automation Training Present Microsoft Certified, Developing and Implementing Web Applications with Microsoft Visual C# .NET and Microsoft Visual Studio .NET Microsoft Certified, Designing and Optimizing Data Access by Using Microsoft SQL Server 2005
